INTERNAL & BUSINESS RISK FACTORS

1. ***Our Company has been formed specifically for the purpose of acquisition of the proprietorship business of our Promoters, Mr. Sanjay Gupta and Mr. Sooraj Gupta, and thus we have limited operating history as a Company which may make it difficult for Investors to evaluate our historical performance or prospects.***

Our Company was originally incorporated as a private limited company with Registrar of Companies, CRC through a Certificate of Incorporation dated March 06, 2024. Post incorporation, the Company acquired the businesses of the past proprietorship firms of our Promoters i.e., M/s Neelmadhav Textiles (in business operations since 2023) and M/s SG Trader (in business operations since 2017) owned by Sooraj Gupta, and M/s SR Fabrics (in business operations since 1994) owned by Sanjay Gupta, as going concerns, aiming for expansion and consolidation of the businesses. Consequently, while our Company has an operating history of more than one year, the combined track record of the Company's business operations is more than three years. Considering our limited operating history as a company, we are able to evaluate our business, prospects and viability for the limited period of one year post incorporation. Our future revenues and profitability are difficult to estimate and could fluctuate significantly, leading to volatility in the price of our Equity Shares. The business of manufacturing through third-party manufacturing facilities and whole sale distribution of denim fabrics was earlier carried by the Promoters' past proprietorship firms which have been taken over by our Company. Although the proprietorships had experienced growth in past years, which we aim to continue, there is no assurance that the same pattern of growth will be consistently met in future. We may not be able to increase revenue or maintain profitability on a quarterly or an annual basis in the same pattern as the past proprietorships. For further details, refer the section titled "***Our History and Certain Other Corporate Matters***" and "***Restated Financial Statement***" on page nos. *154* and 180 respectively of the Prospectus.

2. ***Our Registered Office and Corporate Office are not owned by us and the same have been taken on rent basis. A requirement to relocate our business operations from such premises could have an adverse effect on our business, prospects, results of operations and financial condition.***

The premises on which our Registered Office is situated has been occupied *vide* Rent Deed dated December 29, 2025. Our Company also has a Corporate Office in Ahmedabad occupied *vide* Leave & License Agreement dated December 01, 2025. Both premises are owned by third parties who are not related to our Company in any capacity.

We cannot assure that we will be able to continue the above arrangements on commercially acceptable or favourable terms in future. In the event we are required to vacate the current premises, we would be required to make alternative arrangements for new premises and other infrastructure and facilities. We cannot assure that the new arrangements will be on terms that are commercially favourable to us. If we are required to relocate our business operations during this period, we may suffer a disruption in our operations or have to pay higher charges, which could have an adverse effect on our business, prospects, results of operations and financial condition. For further details, refer the section titled "***Our Business – Our Properties****"* on page no. 143 of the Prospectus.

3. ***We have outsourced our manufacturing processes to third parties without exclusivity arrangements. Any inability to obtain sufficient quantities of processed materials of the requisite quality in a timely manner and at acceptable prices, or any slowdown, shutdown, or disruption in the operations and performance of these third parties could adversely affect our business, results of operations, and financial condition.***

Our Company is currently engaged in the textile business, selling denim fabrics primarily in the states of Delhi, Uttar Pradesh, Gujarat, Haryana, Jharkhand, West Bengal, Rajasthan and Maharashtra. Our Company gets its denim fabrics manufactured through arrangements with various third-party manufacturing facilities situated at Narol and Piplaj in Ahmedabad. While we have recently established a limited self-manufacturing set-up by leasing loom machineries and commenced self-production through such leased machineries, at present our manufacturing processes continue to remain largely outsourced, including the activities of yarn warping, yarn dyeing, and finishing, to our third-party manufacturers. This is in line with our Company's asset-light business model, as the required machineries are readily available with our third-party manufacturers in Ahmedabad at short notice, and ownership of such machinery is not critical at the current scale of operations.

We rely on third parties to provide us with an uninterrupted supply of finished fabrics. However, it cannot be assured that they will do so in a timely manner, or at all. The third parties may decide not to accept our future orders on the same or similar terms, or at all. We face the risk of competitors offering better terms, which may cause third parties to cater to our competitors alongside, or even instead of us. They may discontinue their work on short notice, potentially stalling or hindering our production process.

Additionally, our outsourced manufacturing facilities are subject to various operating risks, such as performance below expected levels of efficiency, excessive wastage of raw materials, production delays, decreases in product quality, labour disputes, natural disasters, industrial accidents, power supply interruptions, and statutory and regulatory restrictions. Any non-compliance by our third-party manufacturers with applicable laws, which may result in a shutdown of their facilities, could lead to delays or non-availability of our product deliveries.

We cannot ensure that the processes carried out by the third parties will be of satisfactory quality. Any failure to maintain quality standards may damage our reputation and adversely affect our business, results of operations, and financial condition. Defects in the products manufactured could expose us to product liability, damage our reputation, and reduce demand for our products. If our third-party manufacturers perform unsatisfactorily, significantly reduce third-party manufacturing volume of denim fabrics, substantially increase prices, or terminate their business relationship with us, the cost and time required to manufacture our products would increase. We may also need to replace our existing third-party manufacturers or take other remedial actions. While we have not experienced any such events as of the date of this Prospectus, there can be no assurance that our third-party manufacturers will continue to provide uninterrupted services or refrain from catering to competitors on more favourable terms, and any withdrawal of services, decline in product quality, or adverse developments affecting their operations may materially and adversely impact our business, results of operations, and future prospects.

4. ***There have been instances of delays and inconsistencies in certain forms which were required to be filed as per the reporting requirements under the Companies Act to RoC. Such non-compliances may attract penalties and prosecution against our Company and its Directors, which could impact our financial position to that extent.***

The Company is committed to adhering to all statutory provisions and regulations under the Companies Act by implementing stringent internal checks and controls. While we have generally maintained compliance with applicable laws, there have been instances in the past of delays and inconsistencies in certain statutory filings with the MCA.

Such delayed filings were subsequently made along with the applicable late filing fees as prescribed by the RoC. No penalties other than payment of additional fees have been imposed by the statutory authorities in relation to the aforesaid delays, and no compounding or adjudication proceedings have been initiated as of the date of this Prospectus. Details of such delayed filings are as follows:

Sr. No.	Name of Form	Date of Event	Due Date of Filing	Actual Date of Filing	Delay (in days)
1.	INC 27 and linked forms INC 33 and INC 34	June 6, 2024	June 21, 2024	July 15, 2024*	24 days
2.	ADT-1	March 27, 2024	April 11, 2024	August 01, 2024	112 days

**While the Company filed Form INC 27 along with the linked Forms INC 33 and INC 34 on July 15, 2024, the Company received a resubmission in respect of the Form INC 27 and a reply was submitted by the Company to the resubmission on August 02, 2024.*

Our Company has identified certain instances where statutory filings and disclosures contained inadvertent inaccuracies or were not made within the prescribed timelines. Details of such instances are set out below:

Sr. No.	Year	Form / Compliance	Remark
1.	2024-25	AOC-4	The Company inadvertently attached the restated financial statement instead of the audited financial statement to the said Form AOC-4, pursuant to which the amounts mentioned under depreciation, total expenses, Profit before Tax, Profit after Tax and EPS (Basic and Diluted) in the said Form AOC-4 are not matching with the amounts mentioned in the attachment. Additionally, the amount in the P&L account in respect of rent paid for FY 2024-25 in the Form AOC-4 has been incorrectly mentioned as ₹1.2 Lakhs instead of ₹ 8.10 Lakhs due to an inadvertent error at the time of filing. Further, the date of allotment of rights issue has been inadvertently mentioned as April 15, 2024 instead of May 15, 2024 in the Director's Report attached to the said Form AOC-4 due to a typographical error. In the Form AOC-2 attached to the Form AOC-4, the remuneration details of the Managing Director and Whole-time Director have been inadvertently

			mentioned as ₹ 1.2 Lakhs per annum instead of ₹ 12 Lakhs per annum due to a typographical error. However, in the linked Form AOC-2, the Directors' remuneration has been correctly disclosed as ₹ 12 Lakhs per annum. For the purpose of rectification, the Company has filed Form GNL-1 with the RoC for adjudication of penalties in relation to the aforesaid inadvertent errors in the said Form AOC-4 on January 24, 2026 bearing SRN no. AC1627616, and the said Form GNL-1 is under process with the RoC.
2.	2024-25	CHG-1 for the secured loan taken from Federal Bank (vehicle loan) of ₹ 16.40 Lakhs	Form CHG-1 has not been filed for the said secured loan. The said loan was originally availed prior to the incorporation of the Company by the erstwhile proprietorship concern M/s SG Trader. The ownership of the underlying vehicle in respect of which this loan was availed can be transferred to the Company only after a no-objection certificate is received from Federal Bank after repayment of the loan. Accordingly, Form CHG-1 could not be filed for the said loan.
3.	2024-25	CHG-1 for the secured loan taken from Kotak Mahindra Bank (loan against property) of ₹ 302.71 Lakhs	Form CHG-1 has not been filed for the said secured loan. The said loan was originally availed prior to the incorporation of the Company by the Promoter Mr. Sanjay Gupta. The ownership of the underlying immoveable property in respect of which this loan was availed is under process of being transferred to the Company, and thereafter Form CHG-1 shall be filed once the property is registered in the name of the Company.

Further, there have been certain instances of inconsistences in the date of event being recorded in the Form DIR-12 and the relevant attachments to the said form due to inadvertent errors. For the purpose of rectification, the Company has filed Form GNL-1 with the Registrar of Companies on April 08, 2026 for adjudication of penalties in relation to such inaccuracies in the DIR-12 filings, vide SRN no. AC2937419. Details of such inconsistences are as follows:

Sr. No.	Name of Form	Event	Date of Event in Filing	Date of Event as Per Attachment
1.	DIR-12	Appointment of Sanjay Gupta as Managing Director	July 20, 2024	July 21, 2024#
2.	DIR-12	Regularization of Sanyogita Gupta as Non-Executive Non-Independent Director	August 12, 2024#	July 20, 2024
3.	DIR-12	Regularization of Tannu Shangle as the Independent Director	August 12, 2024#	July 20, 2024
4.	DIR-12	Appointment of Ravishankar Brijkishor Kushvah as the Chief Financial Officer	August 05, 2024	July 20, 2024#
5.	DIR-12	Cessation of Himani Goel as Company Secretary	July 20, 2024	September 30, 2024#

Reflects the actual date of event.

Such delays and inconsistencies occurred primarily due to inadvertent errors during the initial phase following the incorporation of the Company, while internal compliance systems were being put in place. Although no show cause notices have been issued against our Company till date in respect of the above, in the event of any cognizance being

taken by the concerned authorities in respect of the above, actions may be taken against our Company and Directors. We confirm that in the event any regulatory penalty, fine, or levy is imposed on the Company by any statutory or regulatory authority, the same shall be borne entirely out of the internal accruals of the Company and no Issue proceeds (including the amounts earmarked for general corporate purposes) will be utilised for such payment. We further confirm that the adjudication applications filed in Forms GNL-1 dated January 24, 2026 bearing SRN no. AC1627616 and April 08, 2026 bearing SRN no. AC2937419 as described above will not be withdrawn by the Company.

While the discrepancies highlighted above could be attributed to technical lapses and human errors, our Company is in process of setting up a system to ensure that the requisite filings are done appropriately and within the timelines. The Company has appointed an experienced Company Secretary to ensure timely compliance and accurate statutory filings going forward. These instances of delay and inconsistencies, if repeated, could expose the Company to regulatory actions, penalties and reputational risk, which may adversely affect investor confidence, including that of present and prospective shareholders. However, with enhanced compliance mechanisms now in place, the Company believes that such risks have been mitigated.

5. ***We have had negative cash flows from operating activities and investing activities in the past and may, in the future, experience similar negative cash flows, which could have an adverse impact on our cash flow requirements, business operations and growth plans.***

We have in the past, and may in the future, experience negative cash flows from operating and investing activities. The following table sets forth our net cash inflow/ (outflow) from operating and investing activities for the periods/years indicated:

(₹ in Lakhs)

Particulars	FY 2025-26	FY 2024-25	FY 2023-24
Net Cash from Operating Activities	(1,085.12)	71.82	(40.24)
Net Cash Used for Investing Activities	299.66	(0.15)	(5.01)

We have experienced negative cash flow from our operating activities in FY 2025-26 and FY 2023-24. The negative operating cash flow in FY 2025-26 is mainly attributable to changes in working capital and does not indicate any deterioration in the Company's operational profitability, as the Company earned a profit before tax of ₹ 546.18 Lakhs during the year. The principal reasons for the negative cash flow from operating activities are as follows:

(i) ***Increase in Inventory Holding Period***: The inventory holding period increased from 77 days in the previous year to 102 days during the current year. The Company intentionally maintained a higher level of inventory to secure increase in cost of inventory from expected price increases arising from the ongoing war and related market uncertainties. This strategic decision enabled the Company to obtain the benefit of prevailing market conditions and ensure uninterrupted production.

(ii) ***Reduction in Trade Payable Holding Period***: The trade payable holding period decreased from 56 days in the previous year to 45 days during the current year. This reduction was primarily due to the Company making timely payments and clearing outstanding dues of all MSME suppliers before the year-end, resulting in a significant reduction in trade payables compared to the previous year.

(iii) ***Increase in Short-term Loans and Advances***: The increase in short-term loans and advances is primarily on account of the reclassification of certain non-current advances as current advances based on their expected realization within the next twelve months. This increase represents a balance sheet reclassification rather than an additional cash outflow during the year.

Accordingly, the negative cash flow from operating activities is largely attributable to working capital management decisions, particularly higher inventory levels and faster settlement of trade payables, and does not reflect any adverse impact on the Company's underlying business performance.

Additionally in Financial Year 2023-24 there has been a negative cash flow from operating activities primarily on account substantial increase in closing inventory levels, which resulted in a greater portion of funds being locked in stock. Hence, changes in working capital and increase in inventory led to higher cash outflows from operating activities.

For the Financial Year 2024-25 and 2023-24, there have been negative cash flows from investing activities. For the Financial Year 2024-25, the negative cash flow was due to purchase of property, plant and equipment for ₹ 0.15 Lakhs, while for Financial Year 2023-24, the purchase of property, plant and equipment amounted for ₹ 18.21 Lakhs.

Negative cash flows over extended periods, or significant negative cash flows in the short term, could materially impact our ability to operate our business and implement our growth plans. As a result, our business, financial condition and results of operations could be materially and adversely affected.

Any negative cash outflows from operating activities over extended periods, or significant cash outflows in the short term from investing and financing activities, could have an adverse impact on our cash flow requirements, business operations and growth plans. As a result, our cash flows, business, future financial performance and results of operations could be adversely affected. For further details, see *"**Management's Discussion and Analysis of Financial Condition and Results of Operations**"* on page no. 221 of this Prospectus.

6. ***We do not own the loom machineries used in our manufacturing operations, and any discontinuation or disruption in our arrangement to use such machineries may adversely affect our business operations.***

We have recently established a limited self-manufacturing set-up by leasing ten loom machineries and commenced self-production of denim fabrics through such leased machineries, which are leased to us for a period of three years commencing from March 01, 2025. The loom machineries are situated in the premises of the lessor and we have been granted the exclusive right to use the leased loom machineries along with the portion of the lessor's premises where these machineries are installed for the entire tenure of the said agreement. This arrangement is in the nature of a service contract rather than an equipment lease or a third-party manufacturing arrangement.

While we have not faced any disruption in this arrangement as of the date of this Prospectus, we cannot assure that we will be able to continue this arrangement on commercially acceptable or favourable terms in the future. Further, upon completion of the initial three-year term of the lease arrangement, the Company intends to undertake a comprehensive business review to assess the operational efficiency of this unit, evaluate its alignment with the Company's strategic objectives and identify any modifications required to optimise performance and meet future demand. The outcome of such review may result in a decision to continue, modify, expand, or discontinue operations under the existing lease arrangement.

In the event we are no longer permitted to use the loom machineries or to access the lessor's premises where these machineries are installed, we would need to make alternative arrangements for premises, equipment, and related infrastructure to continue our self-production operations. Such arrangements may not be available on commercially favourable terms or may involve significant additional costs and operational disruptions, which could adversely affect our business, prospects, results of operations, and financial condition. For further details, refer the section titled "***Our Business***" on page no. 129 of this Prospectus.

7. ***We rely on third-party suppliers for raw materials required for our manufacturing activities, such as cotton yarn, polyester blend yarn, etc., and for purchase of finished denim fabrics for wholesale distribution. We have not entered into any long-term supply agreements with them. Any shortage and cessation in supply could adversely affect our business and results of operations. Also, volatility in the prices and non-availability of these raw materials may have an adverse impact in our business.***

We rely heavily on third-party suppliers for procurement of yarn, the primary raw material for manufacturing denim fabrics. We further rely on third-party suppliers for purchase of finished denim fabrics or our wholesale distribution business. Our business involves both trading and contract manufacturing of denim fabrics and while we are dependent on such suppliers to supply raw materials and finished denim fabrics, we do not have long-term agreements with any of our suppliers. Instead, we rely on purchase orders to acquire finished fabrics and raw materials.

Although our supplier base is diversified, we are significantly dependent on certain suppliers. Following table sets forth the purchases made from the top ten suppliers of our Company in the Financial Years 2025-26, 2024-25, and 2023-24.

The cost of raw material for consumption in the manufacturing process and purchases of stock in trade represent a substantial portion of our total expenses, details of which are as follows:

(₹ in Lakhs)

Particulars	Financial Year 2025-26		Financial Year 2024-25	
	Amount	% of total expenses	Amount	% of total expenses
Cost of material consumed	866.18	16.85	1,044.59	23.07
Purchases of stock in trade	4,417.04	85.92	3,489.66	77.08

The supply and pricing of these goods can be volatile due to factors beyond our control, such as fluctuations in fabrics and cotton prices, crude oil prices, global demand and supply of yarns, general economic and political conditions, tariff disputes, transportation issues, and unrest, natural disasters, competition, import duties, infectious disease outbreaks like COVID-19, tariffs. These variables are inherently uncertain, irrespective of the methodologies and assumptions we may use. Discontinuation of supply or failure of suppliers to adhere to delivery schedules or quality standards could disrupt production and adversely affect our business and results of operations. While we have not

experienced any significant disruptions in supply or material quality issues from our suppliers as of the date of this Prospectus, there is no assurance that demand, capacity limitations, or other problems experienced by our suppliers will not result in occasional shortages or delays in supply of these goods. If we face a significant or prolonged shortage from any supplier and cannot procure these goods from alternative sources, we would be unable to meet production schedules and deliver products to customers on time. This would negatively impact our sales, margins, and customer relations. Any delays in the supply or delivery of goods may also delay the delivery and manufacturing processes, adversely affecting our business, cash flows, and results of operations. Furthermore, we cannot assure that we will be able to procure adequate supplies of raw materials in the future, as needed, and on commercially acceptable terms.

Our suppliers may be unable to provide us with a sufficient quantity of the goods as desired by us at prices acceptable to us. Additionally, we may not be able to renegotiate our pricing or delivery terms on reasonable terms or find suitable alternative suppliers in the future, which could negatively impact our business, financial condition, cash flows, and results of operations. Any extended interruption in the supply of finished denim fabrics and raw materials could disrupt our operations and materially affect our business, results of operations, and financial condition. Although we believe we have maintained stable relationships with our suppliers in the past and have not faced any significant supply-side disruptions as of the date of this Prospectus, we cannot assure that we will be able to source adequate quantities of supplies of the goods in a timely manner from our existing suppliers in the future or find alternative suppliers that meet our price and quality requirements. Our inability to secure sufficient raw materials could adversely affect our reputation, business, results of operations, and cash flows. Also, we acknowledge that the price volatility in raw materials will have an impact for us as denim fabrics manufacturer. Further, any adverse shift in our purchase prices may require corresponding adjustment in selling prices. Also, we understand that we are vulnerable to fluctuations in purchase of fabrics, and we will need to partially absorb these fluctuations, which can impact our margins.

8. ***Our supplier base is concentrated in Gujarat, and any supply chain disruptions, operational delays, or increased costs in the region could adversely affect our business and financial performance.***

A significant portion of our Company's supply chain is concentrated in the state of Gujarat, with approximately 20.71% of our suppliers in FY 2025-26 located in this region. This concentration exposes the Company to various risks, which could materially impact our operations. Any disruption to the supply of raw materials or components from this region, whether due to natural calamities, labour unrest, infrastructure failures, or other unforeseen circumstances, may lead to delays in production, increased costs, and an inability to meet market demand. Such disruptions could have an adverse effect on our overall operational efficiency and financial performance.

Furthermore, as 22.75% of our procurement expenditure in FY 2025-26 was directed towards suppliers based in Gujarat, any financial instability or operational challenges faced by these suppliers could lead to significant disruptions in our supply chain. While we have not experienced any such disruptions or adverse developments related to our supplier base in Gujarat as of date of this Prospectus, changes in local regulations, taxes, or economic conditions within Gujarat could result in unanticipated increases in procurement costs or delays in the delivery of essential materials. The concentration of suppliers in a single geographic region may represent a potential risk to the stability and continuity of our operations. Should these risks materialize, they could have an adverse effect on our business, results of operations, and financial condition. For additional details, please refer to the section titled "***Our Business***" on page no. 129 of this Prospectus.

9. ***Some of the immediate relatives of our Promoters, who are deemed to be a part of the Promoter Group under SEBI ICDR Regulations, have not provided their consent, information or any confirmations or undertakings pertaining to themselves which are required to be disclosed in relation to a member of the Promoter Group in this Prospectus. Our Company has disclosed details pertaining to such persons only to the extent available and accessible to our Company including publicly available information, and there can be no assurance that all relevant and/or complete disclosures pertaining to such persons are included in the Prospectus.***

Our Company had earlier filed a draft prospectus with BSE SME on August 12, 2025 in connection with the proposed Issue. Subsequent to such filing, certain immediate relatives of our Promoters conveyed that they did not wish to be associated with the proposed initial public offering or be identified as members of the Promoter Group for the purposes of the Issue. In view of the aforesaid developments, and pursuant to a board resolution dated September 04, 2025, our Company withdrew the draft prospectus previously filed with BSE SME. Thereafter, in connection with the present Issue, our Company had sought and requested to Ritu Agarwal (Sister of Sanjay Gupta), Vishnu Devi Lila (Mother in law of Sanjay Gupta), Vinod Kumar Lila and Keshav Lila (Brothers in law of Sanjay Gupta), Renu Bhojania and Sudarshana Mittal (Sisters in law of Sanjay Gupta) (collectively called "**Concerned Relatives**") and entities in which such individuals may have an interest in ("**Connected Entities**") to provide their consents, confirmations and undertakings in respect of themselves as a members of the Promoter Group of our Company as well as the Connected

Entities which would qualify as part of the Promoter Group of our Company. Our Company sought their consent through letters sent *via* emails on September 10, 2025. However, the Concerned Relatives have conveyed their unwillingness to be identified as the members of Promoter Group and to provide their consents by way of emails received on September 11 to 13, 2025.

Subsequently our Company, pursuant to its letter dated September 19, 2025 ("**Exemption Letter**") had sought an exemption from SEBI under Regulation 300(1) of the SEBI ICDR Regulations from the inclusion of the names of the above referred Concerned Relatives and the Connected Entities as part of the Promoter Group of our Company on account of their unwillingness to be identified as members of the Promoter Group and not receiving the relevant information, confirmations and undertakings required in respect of Promoter Group members. SEBI, pursuant to its letter dated November 20, 2025 rejected our exemption sought in the Exemption Letter and has directed our Company to include the names of the Concerned Relatives and Connected Entities as part of the Promoter Group. In view of the non-receipt of the relevant confirmations and undertaking from the Immediate Relatives and in order to comply with the directions of SEBI in response to our Exemption Letter and the disclosure requirements specified under SEBI ICDR Regulations pertaining to members of the Promoter Group of the Issuer, our Company has disclosed such details pertaining to the Concerned Relatives and Connected Entities in this Prospectus, only to the extent available and accessible to our Company including publicly available information. There can be no assurance that all relevant and/or complete disclosures pertaining to the Concerned Relatives and/or Connected Entities they may be interested in, as members of Promoter Group of the Company are included in this Prospectus.

10. ***We depend on the success of our relationships with our top customers, from whom we derive a significant portion of our revenue. We do not have long term contracts with such customers. If one or more of such customers choose not to source their requirements from us, our business, financial condition and results of operations may be adversely affected.***

The revenue bifurcation of our top ten customers for Financial Years ended March 31, 2026, March 31, 2025 and March 31, 2024 are stated below:

We are dependent on such customers for a certain portion of our revenues. There can be no assurance that our significant customers in the past will continue to place similar orders with us in the future. Also as per the nature of our business, we do not have any firm agreements with our customers. Although we have not experienced any material reduction in orders from our key customers as of date of this Prospectus, a significant decrease in business from any such key customer, whether due to circumstances specific to such customer or adverse market conditions affecting the industry or the economic environment generally, such as the COVID-19 pandemic, may materially and adversely affect our business, results of operations and financial condition.

Our reliance on a selected group of customers may also constrain our ability to negotiate our arrangements, which may have an impact on our profit margins and financial performance. We cannot assure you that we will be able to maintain historic levels of business from our significant customers, or that we will be able to significantly reduce customer concentration in the future. In addition, our revenues may be adversely affected if there is an adverse change in any of our customers' supply chain strategies or a reduction in their outsourcing of products we offer, or if our customers decide to choose our competitors over us or if there is a significant reduction in the volume of our business with such customers. The loss of one or more of our significant customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. Further, to sustain or increase our revenue, we must add new customers and encourage existing customers to allocate a greater portion of their marketing spend to us.

11. ***Inventories and trade receivable form major parts of our current assets. Any failure on our part to effectively manage our inventory and trade receivable may result in an adverse effect on our business, revenue from manufacturing operations and financial condition, net sales, cash flow and liquidity.***

We are in the business of third-party manufacturing and wholesale trading of fabric. Our operations involve maintaining a significant portion of our assets in the form of inventory, including raw materials, work in progress, and finished goods. Maintaining adequate levels of raw material inventory is crucial for our operational continuity, serving as a buffer against supply disruptions. Effective inventory management is essential to respond promptly to changing market conditions. While we have not experienced any material inventory-related disruptions or losses as of date of this Prospectus, any failure on our part to manage our inventory of raw materials and finished products efficiently could adversely affect our financial position and potentially lead to business losses and increased operational costs. During the period ended March 31, 2026, our inventories stood at ₹ 1,685.86 Lakhs.

In the case of overestimating our raw material requirements relative to product demand, it may lead to situations that require us to block more capital and increase our operating cost in connection with inventories, and further exposing us to variations in raw material risk. Conversely, if we are underestimating our raw material requirements, it may adversely affect our ability to manufacture the required quantity of products for our customers' requirements in a timely and cost-efficient manner which may lead to loss of business and / or the opportunity to service customers, which in turn would adversely affect our business, results of operations and financial condition. Further, we may also lose opportunities to acquire raw materials in a cost-effective manner, thereby increasing costs of operations. Delays

in dispatch and ineffective management of trade receivables may adversely affect our operations and financial condition**.**

We rely on timely dispatch and delivery of finished products, including those manufactured through third-party manufacturers. Any delays or unforeseen disruptions in delivery, or improper handling of finished products, could result in inventory loss or damage, adversely impacting our production cycle, customer satisfaction, net sales, and financial condition. Although we have not encountered any material issues relating to delays in dispatch or significant defaults in receivables as of the date of this Prospectus, effective management of trade receivables requires accurate assessment of customer creditworthiness and appropriate credit terms. Failure to do so may lead to bad debts, delayed recoveries, or write-offs, resulting in a liquidity crunch and adversely affecting our profitability and cash flows. As of March 31, 2026 and March 31, 2025, our trade receivables stood at ₹ 979.91 Lakhs and ₹ 858.04 Lakhs, respectively.

12. ***If we are unable to secure raw materials and finished fabrics of the required quality and quantity at competitive prices, or if there is a rise in cotton prices or decline in the quality of cotton (on which our raw material i.e., cotton yarn depends), our business, results of operations and financial condition may be adversely affected.***

Our business relies on cotton yarn as our primary raw material for third party manufacturing of denim fabrics, sourced predominantly from the domestic market. Given its nature, cotton yarn is linked to cotton which is an agricultural commodity and cotton prices are susceptible to fluctuation due to various factors, including weather conditions, government policies and subsidies, energy costs. An increase in cotton prices could lead to increase in prices of cotton yarn potentially harm our operations, leading to adverse effects on our Company, financial position, profitability, and operational outcomes. Although we have not experienced any material disruption in the availability or significant upward movement in the cost of cotton yarn as of the date of this Prospectus, in case the availability or the cost of the cotton yarn is adversely affected or in case there is any upward movement in the price of cotton yarn, it may have a significant effect on the operation of the Company. The reasons which affect the availability or price of the cotton may be beyond our control. Furthermore, any significant shortage or disruption in domestic supply, or a decline in cotton quality due to natural or other causes, may result in higher costs in procuring cotton yarn that could be challenging to transfer to our customers. One or more such reasons may affect our revenues and income from sales of our products and thereby adversely affect our business, profitability, cash flows and results of operations.

In addition to this, we also procure finished fabrics from third party for trading. However, we do not have guaranteed continuity or fixed pricing for these materials and our financial performance depends largely on our ability to arrange from the sellers of such materials in sufficient quantities at competitive prices. While we have not encountered any significant interruptions or price instability in our procurement of finished fabrics as of the Date of this Prospectus, if any of our suppliers are to alter or discontinue relationships with us, it will pose a risk to our supply chain stability. Furthermore, unforeseen events beyond our control, such as war, epidemics, natural disasters, fires, floods, strikes (excluding vendor employee strikes), governmental actions, or transportation delays, could disrupt the supply of raw materials and finished fabric. However, despite these challenges, our extensive network of suppliers enable us to identify alternative sources, both within and outside our current geographic locations.

13. ***Our revenue generation is majorly concentrated in the particular geographical regions of Delhi and Uttar Pradesh, and any adverse developments affecting our operations in these regions could have a significant impact on our revenue and results of operations.***

Our distribution network focuses heavily on supplying fabrics to clients located in Delhi, Uttar Pradesh and Haryana. Delhi, in particular, accounts for a significant proportion of our business being 67.59%, 84.89% and 82.18% during Financial Years ended March 31, 2026, March 31, 2025 and March 31, 2024, respectively. The revenue bifurcation for Financial Years ending on March 31, 2026, March 31, 2025 and March 31, 2024 are stated below:

(₹ in Lakhs)

A significant portion of our revenue is currently derived from Delhi, as it is considered a key hub for textile distribution in India. However, the revenue concentration in Delhi heightens our exposure to competitive pressures, economic shifts, and demographic changes specific to the concerned region. While we have not experienced any material adverse impact due to such regional revenue concentration as of the date of this Prospectus, adverse developments in these areas could potentially affect our business prospects, financial stability, and operational outcomes. As we explore opportunities to expand into new markets and geographical regions, we face competition not only from national players but also from entrenched local competitors. Local players often possess established market presence, familiarity with regional business practices, and strong relationships with distributors, government authorities, and suppliers. These factors may grant them competitive advantages over us, potentially impacting our ability to successfully penetrate new markets and regions. While our management believes that the Company has requisite expertise and vision to grow and mark its presence in other markets going forward, investors should consider our business and prospects in light of the risks, losses and challenges that we face and should not rely on our results of operations for any prior periods as an indication of our future performance.

14. ***Our operations are subject to high working capital requirements. Our inability to maintain an optimal level of working capital required for our business may impact our operations adversely.***

Our business requires significant amount of working capital and major portion of our working capital is utilized towards inventories and trade receivables. The details of our Company's working capital for the Financial Years ended March 31, 2026, March 31, 2025 and March 31, 2024, and its projected working capital for Financial Year 2026-27 and source of funding are set forth below:

**Short-term advances include capital advances of ₹450.50 lakhs relating to property, which were earlier classified as non-current advances. Accordingly, the said amount has not been considered for the calculation of working capital requirement.*

Further, our growing scale and expansion may result in increase in the quantum of current assets. Our inability to maintain sufficient cash flow, credit facility and other sources of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. Further, we have high outstanding amount due from our debtors which may result in a high risk in case of non-payment by these debtors. As of March 31, 2026, our trade receivables stood at ₹ 979.91 Lakhs, which constitutes approximately 17.24% of our revenue from operations for the same period. Any default or delay in recovery from these debtors may adversely affect our business operations, working capital cycle, and overall financial condition. For further details regarding our working capital requirements, please refer to the section "***Objects of the Issue***" on page no. 83 this Prospectus.

15. ***Our Company is promoted by first generation entrepreneurs, which could potentially impact our ability to secure funding or establish partnerships that are critical for growth.***

Our Company is founded by Mr. Sanjay Gupta and Mr. Sooraj Gupta. Mr Sanjay Gupta is a first-generation promoter and Mr. Sooraj Gupta, his son, is a second-generation Promoter. Their experience in managing and being instrumental in the growth of our Company is limited to the extent of their knowledge and experience and we cannot assure that this will not affect our business growth. However, our Promoters, Mr. Sanjay Gupta and Mr. Sooraj Gupta, have cumulative experience of more than 38 years. Investors and stakeholders may exercise caution when entrepreneurs belong to first generation or are having limited knowledge and experience. This could potentially impact our ability to secure funding or establish partnerships that are critical for growth. Established entrepreneurs often have extensive and broad networks within their industries, which can prove invaluable for forming partnerships, collaborations, and accessing resources. Our Promoters may have limited connections, posing challenges in tapping into these opportunities. Furthermore, the lack of extensive prior corporate track record may make it more challenging to attract and retain senior management and skilled personnel who are accustomed to working in a more structured corporate environment, thereby potentially hindering our operational efficiency and expansion plans. Our ability to compete effectively in the market could also be constrained by a perceived lack of corporate maturity, potentially affecting customer confidence and market share acquisition.

16. ***We are heavily dependent on our Promoters and Key Managerial Personnel for the continued success of our business through their continuing services and strategic guidance and support, and the loss of, or our inability to attract or retain, such persons could affect our business, results of operations, financial condition and cash flows.***

Our success heavily depends on the continued services of our Promoters and Key Managerial Personnel, especially Mr. Sanjay Gupta and Mr. Sooraj Gupta. The loss of any of our Promoters or Key Managerial Personnel, or the inability to recruit suitable or comparable replacements, could adversely affect us. Losing the services of our Promoters could significantly hinder our ability to efficiently manage and expand our business. If we are unable to retain qualified employees at reasonable costs, we may be unable to execute our growth strategy effectively. For further details about our Promoters and Key Managerial Personnel, please refer to sections "***Our Management***" and "***Our Promoters***" on page nos. 158 and 171 of this Prospectus.

17. ***The Company, our Promoters, our Directors and our Key Managerial Personnel are not involved in any pending or on-going litigations. However, they may face any litigation proceedings in future which may have any adverse decisions in these cases against them and it may impact business and operations of the Company.***

As on the date of this Prospectus, there are no pending or ongoing legal proceedings against our Company. Further, to the best of our knowledge and belief, our Promoters, our Directors and our Key Managerial Personnel are not involved in any legal proceedings that are currently pending before any court, tribunal, or authority, except tax proceedings which are in the ordinary course. Our Promoters have confirmed that they are not aware of any legal proceedings involving them. The Company has not received any notice, communication, or intimation in relation to any potential claims or disputes that may result in legal proceedings being initiated against it. While the possibility of future legal proceedings in the ordinary course of business cannot be ruled out, we believe that there are no outstanding matters that are or may be material in nature or that could have an adverse impact on our business, operations, financial condition, or reputation.

A summary of any outstanding legal proceedings, if applicable, relating to our Company, Promoters, our Directors and our Key Managerial Personnel as on the date of this Prospectus is provided below:

18. ***Failure to obtain or renew certain licenses in a timely manner or maintain the statutory and regulatory permits and approvals required to operate our business may adversely affect our operations and financial conditions.***

Approvals required by our Company are contingent and subject to numerous conditions, and there can be no assurance that they would be obtained or renewed in a timely manner or would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions, or due to regulatory actions. There have been no past incidents as of the date of this Prospectus of non-compliance by the Company with the terms and conditions of any such approvals or applicable laws. However, if there is any failure by us to comply with applicable regulations or amendments to regulatory frameworks governing our business, such failure could result in increased costs, penalties, revocation of approvals and permits, or suffer a disruption in our operations, any of which could adversely impact our business. Further details regarding all approvals obtained by the Company can be found in the chapter titled "***Government and Other Approvals***" starting on page no. 242 of the Prospectus.

We have also recently established a self-production set up through leased loom machineries installed at the lessor's premises. All statutory licenses, approvals, and certifications in respect of the leased loom machineries and the leased premises, as applicable, are undertaken by and stand in the name of the lessor. Since we are not the holder of these licenses, we do not have full visibility into whether they have been appropriately obtained, are valid, or are compliant with applicable laws and regulations.

Although we are not the legal owner of the machineries or the premises, we are the actual user at present. Therefore, any non-compliance, deficiency, or lapse in the statutory approvals or licenses held by the lessor may result in

regulatory scrutiny, issuance of notices, imposition of penalties, or other enforcement actions against us. While no such incidence of non-compliance, deficiency or lapse in the statutory approvals or licenses held by the lessor has occurred as of the date of this Prospectus, occurrence of such events could lead to operational disruptions, reputational harm, and adverse effects on our financial condition and results of operations.

19. ***Our recent growth rates may not be indicative of our future performance, and any inability to sustain such growth could adversely affect our business, financial condition, and results of operations.***

In FY 2024-25, our revenue from operations increased to ₹ 4,899.33 Lakhs from ₹ 3,931.25 Lakhs in FY 2023-24 reflecting an increase of 24.63%. Further, our PAT increased by 39.93% in FY 2024-25, from ₹ 202.11 Lakhs in FY 2023-24 to ₹ 282.81 Lakhs in FY 2024-25. While our PAT growth continued in FY 2025-26 at ₹ 403.10 Lakhs, it was at a marginally higher rate of 42.53%. Such growth rates in the periods between FY 2023-24 and FY 2025-26 were primarily attributable to specific business factors prevailing during the respective periods, including market demand, pricing trends, operational efficiencies, and certain cost advantages, which may not recur in future periods.

There can be no assurance that we will be able to maintain similar levels of growth in revenue or profitability going forward. Our future growth rates may be lower, more volatile, or may decline, due to factors such as changes in market conditions, competition, input costs, regulatory changes, or our inability to successfully execute our business strategies. Any inability to sustain or manage growth effectively could adversely affect our business prospects and / or financial performance.

For further details, see "***Restated Financial Statement – Annexure II – Statement of Profit and Loss as Restated***" under the section titled "***Restated Financial Statements***" and "***Management's Discussion and Analysis of Financial Condition and Results of Operations***" beginning on page no. 180 and 221, respectively, of the Prospectus.

20. ***We depend on third-party transportation arrangement by our suppliers and customers. Any disruptions may affect our operations, business and financial condition.***

Our Company does not directly manage transportation for the procurement of raw materials or the delivery of finished products. Instead, our suppliers and customers are responsible for arranging their own transportation through third-party providers. While we do not enter into any arrangement for facilitating transportation of our raw materials and our finished products, our operations are reliant on the timely and efficient transportation arrangements made by our suppliers and customers.

The procurement of raw materials by the Company is on a CIF basis, pursuant to which the suppliers arrange transportation and bear the associated risks, and the invoiced price includes transportation costs. Further, sales to customers are generally on an FOB basis, wherein customers arrange and bear the cost of transportation from the factory premises through their own logistics arrangements.

Although we do not directly incur transportation costs, any disruptions in the transportation arrangements made by our suppliers or customers could adversely affect our operations. These disruptions may include delays, damages, or losses during transit, which could impact the timely delivery of raw materials or finished goods. The Company incurs transportation costs only for internal branch transfers, including movement of goods from Gujarat to Delhi, for which it engages locally available transport service providers on a non-contractual basis. Additionally, factors such as rising fuel prices, transportation strikes, weather-related disruptions, accidents, or issues with road infrastructure may result in increased transportation costs or delays. While we have not encountered any significant disruptions to date, prolonged issues affecting transportation logistics could lead to operational delays or the need for alternative solutions, which may not be cost-efficient and could potentially harm our business and financial performance.

21. ***We have in the past entered into related party transactions and may continue to do so in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our Company's financial condition and results of operations.***

Our Company have entered into certain related party transactions with our Promoter and Directors in the past which are in compliance with applicable provisions of Companies Act and all other applicable laws. Set out below is a summary of related party transactions with related parties during Financial Years ended March 31, 2026, March 31, 2025 and March 31, 2024, as per AS 18 – Related Party Disclosure read with the SEBI ICDR Regulations, as derived from the Restated Financial Statements:

Additionally, the Company has entered into three Business Transfer Agreements with related parties involving non-cash consideration through issuance of 2,03,500 Equity Shares, more particularly described under the chapter "***Capital Structure***" and "***Our History and Certain Other Corporate Matters***" on page nos. 60 and 154 of this Prospectus.

While our Company believes that all such transactions have been conducted on arm's length basis, there can be no assurance that it could not have been achieved on more favourable terms had such transactions not been entered into with related parties.

Furthermore, it is likely that our Company will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operations. For detailed information, please refer to "***Restated Financial Statement – Annexure XXX-2 – Related Party Transactions***" under the section titled "***Restated Financial Statements***" beginning on page no. 180 of this Prospectus.

22. ***We may not be able to protect our intellectual property or know-how from third party infringement which could harm our brand.***

Any unauthorized use of our registered trademark 'NJD' by unrelated third parties may damage our reputation and brand. Preventing trademark infringement, particularly in India, is difficult, costly and time-consuming. Our trademark is registered in India; however, such registration may not be sufficient to prevent or deter infringement by third parties. The measures we take to protect our trademark may not be adequate to prevent unauthorized use by third parties,

which may affect our brand and in turn adversely affect our business, financial condition, results of operations and prospects. For detailed information regarding our registered trademark, please refer to the chapter titled "***Government and Other Approvals – Intellectual Property Related Approval***" on page no. 244 of this Prospectus.

23. ***We have incurred indebtedness which exposes us to various risks which may have an adverse effect on our business and results of operations.***

Our ability to borrow and the terms of our borrowings depends upon our financial condition, stability of cash flows, general market conditions, economic and political conditions in our operating markets, and our capacity to service debt. As of March 31, 2026, our total outstanding indebtedness amounted to ₹ 1,417.58 Lakhs, out of which ₹ 359.65 Lakhs are long term borrowings and ₹ 1,057.93 Lakhs are short term borrowings.

Our significant indebtedness in future may result in substantial amount of debt service obligations which could lead to:

1. limiting our flexibility in planning for, or reacting to, changes in our business and the industry;
2. limiting our ability to borrow more money both now and in the future; and
3. increasing our interest expenditure and adversely affecting our profitability.

While we have not, as of the date of this Prospectus, experienced any instance of loan recall or default in meeting our debt obligations, if our loans are recalled on short notice, we may need to secure funds quickly to meet the immediate demand. Occurrence of these events could adversely affect our cash flow and the financial condition of the Company. For further details regarding our indebtedness, please refer to the *"**Financial Indebtedness**"* on page no. 234 of this Prospectus.

24. ***The average cost of acquisition of Equity Shares by our Promoters is lower than the Issue Price, which may result in a notional gain to them and could lead to a perception of inequitable pricing for public investors.***

The average cost of acquisition of Equity Shares by our Promoters in our Company is lower than the final Issue Price in which Equity Shares are to be Issued. Details of average cost of acquisition of Equity Shares held by the Promoters are set out as below:

(₹ in Lakhs)

Name of the Promoters	Average Cost of Acquisition
Sanjay Gupta	10.67
Sooraj Gupta	8.19
Sanyogita Gupta	N.A.

For further details regarding the average cost of acquisition of Equity Shares by our Promoters and the buildup of Equity Shares in our Company, please refer to the chapter "***Capital Structure***" beginning on page no. 60 of this Prospectus.

The average cost of acquisition of Equity Shares by our Promoters has been calculated by taking into account the amount paid by them to acquire and shares allotted to them as reduced by amount received on sale of shares, i.e., net of sale consideration is divided by net quantity of shares acquired.

As a result, upon sale of their shareholding after the completion of the Issue, our Promoters may realize substantial gains. This disparity may lead to a perception among investors that the Promoters are benefiting disproportionately compared to public shareholders subscribing in the Issue. Further, while such gains are notional at the time of allotment and subject to market conditions, this could influence investor sentiment and may be perceived as a risk factor in terms of fairness of pricing. There can be no assurance that such perception will not adversely affect the trading price of our Equity Shares post-listing.

25. ***We will continue to be controlled by our Promoters after the completion of the Issue, which will allow them to influence the outcome of matters submitted for approval of our Shareholders.***

Post completion of the Issue, our Promoters, Mr. Sanjay Gupta and Mr. Sooraj Gupta, will hold the majority of our outstanding Equity Shares. Consequently, our Promoters will continue to exercise significant control over us, including the ability to shape the composition of our Board and make decisions requiring shareholders' or Board's approval. The said Promoters may take or block action with respect to our business that may not align with the interests of our minority shareholders or the Company. By leveraging their controlling power, our Promoters may delay, defer,

or influence changes in our control or capital structure, as well as impact potential merger, consolidation, takeover or other business combinations involving our Company. Additionally, they may encourage or discourage potential acquirers from making tender offers or attempting to obtain control. While exercising their rights, we cannot guarantee that our Promoters and Promoter Group will constantly prioritize our Company's interests. For further details regarding the Promoter's shareholding, please refer to chapter titled "***Capital Structure***" beginning on page no. 60 of this Prospectus.

26. ***Our contingent liabilities may materially and adversely affect our business, results of operations and financial condition.***

A summary of our contingent liabilities, as indicated in our Restated Financial Statements is as follows:

(₹ in Lakhs)

Particulars	FY 2025-26	FY 2024-25	FY 2023-24
Claims against the Company not acknowledged as debt	4.60	3.65	2.76

These liabilities pertain to outstanding GST demands of the past proprietorship concerns, details of which are set out below:

(i) The contingent liability of ₹ 2.70 Lakhs pertains to the outstanding demand of Mr. Sanjay Gupta (with respect to his past proprietorship concern M/s SR Fabrics) under the GST Act, having demand reference number ZD071223144221Z, related to the Financial Year 2017-18. Pursuant thereto, an appeal has been filed by Mr. Sanjay Gupta on March 23, 2024, and the management believes that the appeal will be decided in their favour. Consequently, no provision has been created by the Company for this liability.

(ii) The contingent liability of ₹ 1.91 Lakhs pertains to the outstanding demand of Mr. Sooraj Gupta (with respect to his past proprietorship concern M/s SG Trader) under the GST Act, pursuant to the demand notice dated June 29, 2025 related to Financial Year 2019-20 in connection with a separate GST inquiry involving a past supplier of M/s SG Trader. A reply was submitted to the authority on July 19, 2025 and thereafter an order was passed against Mr. Sooraj Gupta (with respect to his proprietorship concern) on December 29, 2025 confirming the demand and penalty, which is intended to be challenged.

As the aforesaid contingent liabilities are cumulatively less than ₹ 5.00 Lakhs, they are not expected to have a material adverse impact on the operations of the Company. In the event such liabilities materialize, the same shall be met out of the internal accruals of the Company and no portion of the Issue proceeds shall be utilized for payment of such liabilities. For further information on such contingent liabilities, please refer section titled *"**Restated Financial Statement – Annexure XXXII – Details of Contingent Liabilities and Commitments as Restated**"* under the section titled "***Restated Financial Statements***" beginning on page no. 180 of this Prospectus.

27. ***The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company, and an inability to effectively utilize the Issue Proceeds could have adverse effects on our finances.***

Since the Issue does not exceed ₹ 5,000.00 Lakhs, according to SEBI ICDR Regulations, our Company is not required to appoint an independent Monitoring Agency for overseeing the deployment of funds raised through this Issue. The management and Board of Directors of our Company will have discretion over the utilization of these funds, and it will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue Proceeds could have adverse effects on our finances.

28. ***The Objects of the Issue for which funds are being raised, are based on our management estimates and any bank or financial institution or any independent agency has not appraised the same. The deployment of funds will be entirely at our discretion, based on the parameters as mentioned in the chapter titles "Objects of the Issue", which could potentially delay our business plans and/or have an adverse impact on our expected revenues and earning.***

The fund requirement and deployment are mentioned in the "***Objects of the Issue***" on page no. 83 of this Prospectus are derived from estimates provided by our management and have not undergone for appraisal by any bank, financial institution, or independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. Given the highly competitive and dynamic nature of our business, we may need to revise our business plan periodically, resulting in potential adjustments to the associated fund requirements.

Further, the allocation of funds as stated under chapter "***Objects of the Issue***" is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency oversight. However, the Audit Committee of our Company will monitor the deployment of funds and ensure disclosure for the same as per applicable provisions. Additionally, we cannot assure that the actual costs or implementation schedule as stated in the "***Objects of the Issue***" chapter will not deviate from the estimated costs or schedule. Such variances may arise due to various factors, some of which may be beyond our control. The occurrence of any such event could potentially delay our business plans and/or have an adverse impact on our expected revenues and earnings.

29. ***Under-utilisation of our manufacturing capacity, if sustained or increases, may adversely affect our operational efficiency and financial performance.***

Our manufacturing facilities are presently operating at an average capacity utilisation of approximately 80% as of June 30, 2026. The establishment of our in-house manufacturing facilities represents a relatively recent expansion of our business operations, and we are currently in the process of progressively scaling up production and aligning capacity utilisation with customer demand and operational efficiencies. Historically, and continuing presently, a significant portion of our revenue is derived from trading of fabrics and contract manufacturing through third-party manufacturers, which may result in a portion of our installed capacity remaining under-utilised at certain times.

The marginal under-utilisation of capacity may arise due to normal operational factors, including routine downtime for preventive maintenance, machine calibration and occasional technical issues, as well as product mix variations requiring machine reconfiguration, trial runs and process stabilisation. In addition, production scheduling based on order patterns, batch sizes and specialised manufacturing requirements may lead to temporary capacity gaps. Further, our existing business mix, including reliance on trading and outsourced manufacturing for certain orders, as well as working capital considerations for scaling in-house production, may also impact the extent to which our installed capacity is utilised.

While maintaining a certain level of spare capacity provides operational flexibility and supports demand variability, any prolonged or significant under-utilisation of our manufacturing facilities could lead to sub-optimal absorption of fixed costs, increased per unit production costs and reduced operating leverage. This may adversely affect our margins, profitability, cash flows and overall financial performance.

30. ***We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue Proceeds may delay the implementation schedule.***

The proposed fund requirement mentioned in the section titled "***Objects of the Issue***" is to be funded from the proceeds of this Issue. We have not identified any alternative sources of funding. Therefore, any failure or delay on our part to mobilize the required resources or any shortfall in the Issue Proceeds may delay our implementation schedule. As a result, we cannot assure that we will be able to execute our future plans and strategies within the specified timeframe. For further details, please refer to the chapter titled "***Objects of the Issue***" starting on page no. 83 of this Prospectus.

31. ***Our insurance coverage may not be adequate to protect us against certain operating hazards, which may have a material adverse effect on our business.***

Our Company has obtained insurance coverage in respect of certain anticipated risks which are standard for our type of business and operations, *viz.* stock insurance. While we believe that we have obtained insurance coverage in adequate amounts consistent with size of our business, such insurance coverage does not cover all risks to which we may be exposed. For further details of our insurance coverage, see "***Our Business – Insurance***" on page no. 140 of this Prospectus.

While we believe that the insurance coverage maintained by us is in accordance with industry standards, there can be no assurance that any claim under such insurance policies will be honoured fully, partially or on a timely basis, or that the insurance coverage maintained by us will be sufficient to cover all material losses. To the extent that we suffer losses that are not insured, are inadequately insured, or exceed our insurance coverage, such losses would have to be borne by us and could adversely affect our cash flows, results of operations and financial performance. In the event that our Company files a claim under any applicable insurance policy, there can be no assurance that we will be able to recover all or part of the losses incurred. We have not experienced any uninsured or underinsured loss events or rejected insurance claims in the past; however, there can be no assurance that similar events will not occur in the future, and any such occurrence could materially and adversely affect our business, financial condition, results of operations and prospects.

In respect of the loom machineries taken by the Company on a lease basis, it is the responsibility of the lessor to obtain and maintain insurance coverage for such machinery. Any loss or damage relating to the leased machinery shall be the responsibility of the lessor. Although our operations presently do not involve employees or premises that are exposed to significant occupational risks or hazards, any unforeseen event, change in the nature or scale of our operations, or expansion into new business activities may expose us to additional risks for which existing insurance coverage may not be adequate or available on commercially acceptable terms.

32. ***Fraud, theft, employee negligence or similar incidents may adversely affect our results of operations and financial condition.***

Our operations may be subject to incidents of theft or damage to inventory. The business may also encounter some inventory loss on account of employee theft, vendor fraud and general administrative error. While we have not experienced any such instance in the past, there can be no assurance that we will not experience any fraud, theft, employee negligence, security lapse or similar incidents in the future, which could adversely affect our results of operations and financial condition. Though we have insurance, losses due to theft, fire, breakage or damage caused by other casualties, could adversely affect our results of operations and financial condition.

33. ***We are subject to risks associated with rejection of our products consequential to defects, which could adversely affect our business, results of operations or financial condition. Also, we may in the future face potential liabilities from lawsuits or claims by consumers including product liability claims.***

Since we operate in the fabric and textile manufacturing sector, we are exposed to the risk of potential legal actions and claims from customers, particularly related to defective fabric or dissatisfaction with our products. While we have not received any such claims as of the date of this Prospectus, there can be no assurance that such claims will not arise in the future. In the event of any return of defective products or if we are found to be liable for a product liability claim, we may be compelled to pay significant monetary damages, which could adversely affect our business, financial condition, and results of operations.

Even if we successfully defend ourselves against any such claims or recover compensation from third parties, the process of defending against claims or seeking compensation could require substantial time and financial resources. Moreover, our reputation may suffer in the event of prolonged disputes or negative publicity, even if the claims are ultimately resolved in our favour. We cannot assure you that no claims will be brought against us in the future or that we will be able to successfully resolve any claims that may arise, which could have a material impact on our business.

34. ***Any failure to maintain quality control systems for our goods could have a material adverse effect on our business, reputation, results of operations and financial condition.***

The quality and timely delivery of the goods we manufacture, through manufacturing arrangements with third-parties as well as our leased loom machineries are critical to the success of our business. We rely on our suppliers and third-party manufacturers to implement their own quality control systems and policies to ensure that the products meet the required standards. Additionally, we occasionally verify these quality control processes on the manufacturer's premises to assess their effectiveness. However, our ability to control the quality of products manufactured by third parties is limited, and there is no guarantee that their quality control systems will consistently operate as intended. As of the date of this Prospectus, we have not encountered any significant failures or lapses in the quality control systems of our suppliers or third-party manufacturers that have materially impacted our business.

In the event of significant failures or inadequacies in the quality control systems of our suppliers or third-party manufacturers, our business could be adversely affected. Such failures could lead to defective products, delayed deliveries, or reputational damage, which may harm our customer relationships and brand image. Furthermore, if any health or safety hazards arise due to defects in products manufactured by third parties, we may be exposed to civil and/or criminal liabilities, as well as regulatory actions. Public interest litigations, penalties, and lawsuits filed by regulatory authorities could further harm our reputation, disrupt our operations, and have a material adverse effect on our financial results and overall financial condition.

35. ***Our Company if not able to manage our growth, or to successfully implement our business plan, could have an effect on our business, results of operations and financial condition.***

The success of our business will depend greatly on our ability to effectively implement our business and growth strategy. Our growth strategy involves increasing of geographical presences and focus on consistently meeting quality standards. For further details, refer chapter titled "***Our Business – Our Business Strategy***" on page no. 138 of this

Prospectus. We have successfully executed our business strategies in the past but there can be no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted customers. Our success in implementing for growth strategies may be affected by:

(i) Our ability to identify new market to expand;
(ii) Our ability to maintain quality of our products; and
(iii) Changes in the local regulatory environment in the field of textiles.

If our Company fails to execute our strategy within the estimated budget and timeline, or if our expansion and development plans do not yield increased profitability as estimated, it could significantly impact our results of operations. Further, we expect our growth strategy will place significant demands on our management, financial and other resources and require us to continue developing and improving our operational, financial and other internal controls. Our inability to effectively manage our business and implement our growth strategy could adversely affect our business, financial condition, and profitability.

36. ***We may not be able to adapt to changing market trends and customer requirements in the fashion market in a timely manner, or at all which could have an adverse effect on our business, results of operations and financial condition.***

The garment fashion market in our country is highly competitive, with several players operating across various segments, including through third-party e-commerce platforms. If we are unable to anticipate consumer preferences or industry changes, or being unable to adapt our products to meet consumer preference and pricing in a timely manner, we may lose our customers to our competitors or may force to reduce our sales realization on our products by offering them at discount. For instance, manufacturing for a season begins well ahead of its commencement, making it challenging to access and incorporate prevailing trends or adapt to sudden emergence of new trends relevant to that season in the released collection. If our competitors able to successfully cater to these market demands, or if we are unable to anticipate or misjudge demand quantities, it could lead to lower sales, increased inventories, and higher discounting. Each of these outcomes could significantly impact our results of operations and financial condition.

The garment fashion market in India is highly dynamic and competitive, with multiple players operating across various segments, including through third-party e-commerce platforms. A key challenge for our Company is the timely adaptation to changing market trends and consumer preferences. Similar nature of leased loom machineries used by us in self-production of denim fabrics are also employed by our contract manufacturers and finished product suppliers. These machineries are versatile and can be used to produce a wide variety of denim fabrics, enabling them to quickly adapt to the latest fashion trends. However, this flexibility also means that in periods of rapidly changing fashion trends, there is a risk that our suppliers or competitors could shift production to meet emerging demands faster than we can.

If we are unable to anticipate or react quickly enough to changes in consumer preferences, or if we fail to align our products with the latest fashion trends in a timely manner, we may lose market share to more agile competitors. Additionally, delays in incorporating new trends or in adapting our existing product range could lead to excess inventory, forced discounting, and reduced sales realization. Manufacturing for fashion seasons begins well in advance, making it difficult to forecast and incorporate sudden changes in trends that may emerge close to or during the season. If competitors are able to more effectively cater to these market demands, or if we misjudge demand quantities, it could result in lower sales, increased inventory levels, and greater discounting, all of which could materially adversely affect our financial results and overall business performance.

37. ***Our KMPs are associated with our Company for less than one year, which may affect continuity, familiarity with our operations and effective management of our business.***

Our Key Managerial Personnel, Ms. Chanchal Khandelwal, Company Secretary & Compliance Officer, who has over seven years of experience as a company secretary, and our Chief Financial Officer, Mr. Mohan Mishra, who has over 15 years of experience in accounts and financial operations, have been associated with our Company for a period of less than one year. Therefore, they may not have been accustomed to our Company affairs till date.

Any lack of familiarity or continuity at the key managerial level may affect the efficiency of decision-making, internal coordination and implementation of policies and controls, particularly in a growing and regulated business environment. If our Company is unable to ensure effective integration and retention of such personnel, or if there is any disruption in their roles, our business operations, compliance functions and overall management effectiveness

may be adversely affected. For details of Key Managerial Personnel and their appointment, see "***Our Management***" on page no. 158 of this Prospectus.

38. ***There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the BSE SME in a timely manner, or at all, which could adversely affect investors' ability to trade the Equity Shares.***

In accordance with Indian legal norms and practices, permission for the listing and trading of Equity Shares issued through this Issue shall not be granted until the Equity Shares have been Issued and Allotted. The approval process for listing and trading requires the submission of all necessary documents authorizing the issuance of Equity Shares. There could be a possibility of failure or delay in obtaining listing approval for the Equity Shares on the BSE SME platform. Any such failure or delay could significantly restrict your ability to liquidate or dispose of your Equity Shares.

39. ***Adverse publicity regarding our products could negatively impact us.***

As we are engaged in the business of manufacturing and trading of finished denim fabrics, we are exposed to the risk of adverse publicity related to our products, production practices, or similar products in the industry. Negative publicity concerning the quality, safety, or environmental impact of our products, or issues affecting other players in the textile and garment sector, could result in a decline in consumer confidence and demand for our products. Additionally, concerns related to harmful chemicals, unethical labour practices, or sustainability issues could trigger significant backlash against our brand. As of the date of this Prospectus, we have not faced any significant adverse publicity that has materially impacted our reputation or business operations.

Such adverse publicity could damage our reputation, result in lost sales, or lead to the cancellation of contracts with suppliers or customers. This could adversely impact our ability to attract new customers, maintain existing relationships, and achieve desired revenue levels. A reduction in sales, cash collections, and customer demand, particularly if the negative publicity is sustained or escalates, could have a material adverse effect on our financial performance, growth prospects, and ultimately our ability to meet operating cash flow requirements.

40. ***In addition to normal remuneration, other benefits and reimbursement of expenses, our Promoters are interested in our Company to the extent of their shareholding and entitlement to dividends in our Company. It cannot be guaranteed that our Promoters will exercise their shareholder rights in the best interest of our Company, thereby impacting our business operations, financial results and future prospects adversely.***

In addition to their regular remuneration and expense reimbursements, our Promoters Mr. Sanjay Gupta, Mr. Sooraj Gupta and Ms. Sanyogita Gupta have vested interests in our Company through their shareholding and entitlement to dividends, to the extent of their shareholdings. Consequently, these Promoters and the Director will continue to exercise significant control over our Company, influencing board composition and decisions requiring simple or special majority voting. Other shareholders may be unable to affect the outcome of such voting. We cannot guarantee that our Promoters and the Director will consistently exercise their shareholder rights in the best interests of our Company. This situation may potentially impact our business operations, financial results, and future prospects adversely.

41. ***Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements, and there can be no assurance that our Equity Shares will appreciate in value.***

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, refer "***Dividend Policy***" on page no. 179 of this Prospectus.

42. ***Certain key performance indicators for certain listed industry peers included in this Prospectus have been sourced from public sources and there is no assurance that such financial and other industry information is complete.***

In compliance with the SEBI ICDR Regulations, we have included specific key performance indicators, comprising financial and operational data, for selected listed industry peers, detailed in the "***Basis for Issue Price***" section starting on page no. 100 of the Prospectus. This information has been sourced from and relies upon the audited financial

statements of relevant listed industry peers, accessible on Stock Exchanges' websites, including annual reports submitted to the respective Stock Exchanges. It should be noted that there is no guarantee of the completeness of this information concerning industry peers. Different methodologies and formulas may have been employed in calculating the various ratios. Investors are advised not to place undue reliance on this information in making investment decisions. Any reliance on such data for benchmarking or valuation purposes should be undertaken with caution and a clear understanding of its limitations.

43. ***Any future issuance of Equity Shares may dilute your shareholdings, and sale of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.***

Any future equity issuance by our Company may result in the dilution of Investors' ownership stakes in our Company. In addition, significant sales of Equity Shares in the public market following the completion of this Issue, including those by our major shareholders, or concerns regarding such sales, could negatively impact the market price of the Equity Shares and potentially restrict our ability to raise capital through future offerings of Equity Shares. The potential impact of market sales of Equity Shares held by our major shareholders or the availability of these shares for future sale on the market price of our Equity Shares cannot be accurately predicted at this time.

44. ***Third party industry and statistical data in this Prospectus may be incomplete, incorrect or unreliable, and undue reliance may result in incorrect investment decision.***

Neither Lead Manager nor we have independently verified the data obtained from the official and industry publications and other sources referred in this Prospectus and therefore, while we believe them to be true, there can be no assurance that they are complete or reliable. Such data may also be produced on different bases from those used in the industry publications we have referenced. EXTERNAL RISKS

45. ***A slowdown in economic growth in India may adversely affect our business, financial condition, cash flows, results of operations and prospects.***

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by centre or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located in other countries, including India. Negative economic developments, such as rising fiscal or trade deficits, or a default on national debt, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general.

Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse effect on the price of our raw materials and demand for our products and, as a result, on our business and financial results. The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

46. ***Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.***

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. For further details, please refer to the chapter "***Key Regulations and Policies***" on page no. 145 of this Prospectus for details of the laws currently applicable to us.

There can be no assurance that the Central or the State Governments in India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Central or the State Governments in India and other regulatory bodies or impose onerous requirements and conditions on our operations. New compliance requirements could increase our costs or otherwise adversely affect our business, financial condition and results of operations. Any such changes and the related uncertainties with respect to the implementation of the new regulations may have a material adverse effect on all our business, financial condition and results of operations.

47. ***Natural disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business.***

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19, man-made disasters, including acts of war, terrorist attacks, environmental issues and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition, cash flows and results of operations.

Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations. Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operation as well as the price of the Equity Shares.

48. ***Financial instability in other countries may cause increased volatility in Indian financial markets.***

The Indian market and the Indian economy are influenced by economic and market conditions in other countries including conditions in the United States, Europe and certain emerging economies in Asia. Financial instability in other parts of the world could have a global influence and thereby negatively affect the Indian economy. Financial disruptions could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows. Financial turmoil in Asia, United States, United Kingdom, Russia and elsewhere in the world in recent years has adversely affected the Indian economy. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Further, economic developments globally can have a significant impact on our principal markets. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy.

These developments, or the perception that any of them could occur, have had and may continue to have a material adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity, restrict the ability of key market participants to operate in certain financial markets or restrict our access to capital. This could have a material adverse effect on our business, financial condition and results of operations and reduce the price of the Equity Shares.

49. ***Investors outside India subscribing to this Issue may not be able to enforce any judgment of a foreign court against us, except by way of a suit in India.***

Our Company is a limited liability company incorporated under the laws of India. Our Company's assets are located in India. As a result, it may be difficult for investors to effect service of process upon us or such persons in India or to enforce judgments obtained against our Company or such parties outside India. India is not a party to any international treaty in relation to the recognition or enforcement of foreign judgments. India has reciprocal recognition and enforcement of judgments in civil and commercial matters with a limited number of jurisdictions, including the United Kingdom, Singapore, UAE, and Hong Kong. A judgment from certain specified courts located in a jurisdiction with

reciprocity must meet certain requirements of the Code of Civil Procedure, 1908, as amended. The United States has not been notified as a reciprocating territory.

In addition, any person seeking to enforce a foreign judgment in India is required to obtain the prior approval of the RBI to repatriate any amount recovered, and we cannot assure that such approval will be forthcoming within a reasonable period of time, or at all, or that conditions of such approvals would be acceptable. Such amount may also be subject to income tax in accordance with applicable law. Consequently, it may not be possible to enforce in an Indian court any judgment obtained in a foreign court, or effect service of process outside of India, against Indian companies, entities, their directors and executive officers and any other parties resident in India. Additionally, there is no assurance that a suit brought in an Indian court in relation to a foreign judgment will be disposed of in a timely manner.

50. ***If inflation were to rise in India, we might not be able to increase the prices of our services at a proportional rate thereby reducing our margins.***

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of transportation, wages, raw materials and other expenses relevant to our business. High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs.

Any increase in inflation in India can increase our expenses, which we may not be able to adequately pass on to our customers, whether entirely or in part, and may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or entirely offset any increases in costs with increases in prices for our products. In such case, our business, results of operations, cash flows and financial condition may be adversely affected. Further, the government has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

51. ***Recent and future changes in laws, including the recently notified Digital Personal Data Protection Rules, 2025 and the labour codes, may require us to incur additional compliance costs, and any inability to comply with such new requirements may adversely affect our business and operations.***

The regulatory landscape applicable to our business is evolving, with several new laws and rules having been recently notified or proposed, including the Digital Personal Data Protection Rules, 2025 notified under the Digital Personal Data Protection Act, 2023, and the four labour codes *viz.* the Code on Wages, 2019, the Industrial Relations Code, 2020, the Code on Social Security, 2020 and the Occupational Safety, Health and Working Conditions Code, 2020 notified by the Government of India. These new legislations introduce substantive changes relating to data protection, employee rights, workplace conditions, social security, employer obligations and reporting requirements. Compliance with these laws may require us to update our internal policies, modify our human resources and operational practices, implement new technological or organisational measures, and incur additional expenses towards legal advisory, training, and system upgrades.

There can be no assurance that we will be able to fully assess, implement, and comply with the requirements of such new laws in a timely manner. Any delay, inadvertent non-compliance, or inability to meet the prescribed standards may expose us to penalties, legal proceedings, operational disruptions, or reputational harm. Additionally, further changes in regulations or their interpretation by authorities may impose additional obligations or compliance burdens on us. Any such events may adversely affect our business, financial condition, results of operations and prospects.

52. ***Increasing employee compensation in India may erode some of our Company's competitive advantage and may reduce our Company's profit margins, which may have a material adverse effect on our Company's business, financial condition, cash flows and results of operations.***

Employee compensation in India has historically been significantly lower than employee compensation in the United States and Western Europe for comparably skilled professionals. However, compensation increases in India may erode some of this competitive advantage and may negatively affect our Company's profit margins. Employee compensation in India is increasing at a faster rate than in the United States and Western Europe, which could result in increased costs relating to managers and other mid-level professionals. Our Company may need to continue to increase the levels of our Company's employee compensation to remain competitive and manage attrition. Compensation increases may have a material adverse effect on our Company's business, financial condition, cash flows and results of operations.

53. ***Changes in technology may render our current technologies obsolete or require us to make substantial capital investments and failure to respond to technological advancements and emerging standards and practices on a cost-effective and a timely basis may affect our results of operations.***

Modernization and technology up gradation is essential to reduce costs and increase the output. Our production technology may become obsolete or may not be upgraded timely, hampering our operations and financial conditions. Although we believe that we have installed plant and machineries with the latest upgraded technology suitable for yarn production, we shall further continue to keep our technology updated. In case of availability of an updated technology in the industry, we may be required to implement new technology as failure to respond to technological advancements and emerging standards and practices on a cost-effective and a timely basis may affect our results of operation. Further, the cost in upgrading our technology may be significant which could substantially affect our finances and operations.

54. ***Our performance is linked to the stability of policies and the political situation in India, and a significant change in India's policies could adversely affect our business.***

The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Any political instability in India may adversely affect the Indian securities markets in general, which could also adversely affect the trading price of our Equity Shares. Any political instability could delay the reform of the Indian economy and could have a material adverse affect on the market for our Equity Shares. There can be no assurance to the investors that these liberalization policies will continue under the newly elected government. Protests against privatization could slow down the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting companies in the industrial equipment manufacturing sectors, foreign investment, currency exchange rates and other matters affecting investment in our securities could change as well. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India and thereby affect our business.

55. ***Under Indian legal regime, foreign investors are subject to investment restrictions that limit our Company's ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares. Accordingly, our ability to raise foreign capital may be constrained.***

As a company incorporated in India, we are subject to exchange controls that govern the borrowings in foreign currencies. Further, under applicable foreign exchange regulations in India, transfer of shares between non-residents and residents are freely permitted (subject to compliance with sectoral norms and certain other restrictions), if they comply with the pricing guidelines and reporting requirements specified under applicable laws. If share transfer is not in compliance with such requirements and does not fall under any of the permissible exceptions, then prior approval of the relevant regulatory authority is required. Such regulatory restrictions limit our financing sources and could constrain our ability to obtain financings on competitive terms and refinance existing indebtedness.

56. ***Downgrading of India's sovereign debt rating by an international rating agency could have an adverse impact on our business and results of operations.***

Any adverse revisions to India's credit ratings of international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

57. ***The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price, and you may not be able to sell your Equity Shares at or above the Issue Price.***

This Issue is being made through Fixed Price Process and the Issue Price of the Equity Shares have been based on many factors, which may not be indicative of the market price of our Equity Shares after the Issue. For further information, please refer the chapter titled "***Basis for Issue Price***" beginning on page no. 100 of the Prospectus. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price.

58. ***The requirements of being a listed company may strain our resources, diverting our management's attention from business concerns, and adversely affecting our business, financial condition and results of operations.***

We are not a listed company and have historically not been subjected to the compliance requirements and increased scrutiny of our affairs associated with being a listed company by shareholders, regulators, and the public at large. As a listed company, we will incur significant legal, accounting, corporate governance, and other expenses that we did not previously incur as an unlisted company. We will be subject to the SEBI Listing Regulations which will require us to file audited annual and unaudited quarterly reports of our business and financial conditions. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may be unable to readily determine and accordingly report any changes in our results of operations or cash flows as promptly in comparison to the other listed companies.

Furthermore, as a listed company, we will be required to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management's attention may be diverted from our business concerns, which may adversely affect our business, prospects, financial condition, results of operations and cash flows. In addition, we may need to hire additional staff with appropriate experience and technical legal and accounting knowledge for our legal and accounting departments, but we cannot assure you that we will be able to do so in a timely and efficient manner.

59. ***We may require further equity issuance, which will lead to dilution of equity and may affect the market price of our Equity Shares or additional funds through incurring debt to satisfy our capital needs, which we may not be able to procure and any future equity offerings by us.***

Our growth is dependent on having a strong balance sheet to support our activities. In addition to the Issue Proceeds and our internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favourable to the then existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt-to-equity ratio to increase or require us to create charges or liens on our assets in favour of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy.

Any future issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence affect the trading price of our Company's Equity Shares and its ability to raise capital through an Issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company's Equity Shares. Additionally, the disposal, pledge or encumbrance of Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

(b) Allotment of 2,03,500 Equity Shares pursuant to the acquisition of the businesses of M/s SR Fabrics, M/s Neelmadhav Textiles and M/s SG Trader from Sanjay Gupta and Sooraj Gupta for consideration other than cash, on rights basis, in the ratio of 2035 Equity Shares against 100 Equity Shares held by the existing shareholders, as renounced by the existing shareholder to whom it was offered on right basis, details of which are mentioned herein below:

Sr. No.	Name of Subscribers	No. of Shares Subscribed	Face Value per share (₹)
1.	Sanjay Gupta	1,15,918	10
2.	Sooraj Gupta	87,582	10
Total		**2,03,500***	**-**

** The rights issue ratio of 2,035 new Equity Shares for every 100 Equity Shares held was determined by the Company's internal management and approved by the Board of Directors for the purpose of facilitating the acquisition of all assets, liabilities and goodwill of the three proprietorship firms as going concerns. The consideration for the acquisitions was determined based on independent valuation reports dated April 30, 2024, pursuant to which the aggregate purchase consideration was assessed at ₹ 407.00 Lakhs. Accordingly, 2,03,500 Equity Shares were allotted to discharge the said consideration. Since the allotment was undertaken for the purpose of business takeover and the rights entitlement was renounced in favour of the erstwhile proprietors, the resulting dilution remained within the Promoters Sanjay Gupta and Sooraj Gupta, and no third-party investors were introduced at this stage.*

(c) Bonus issue of 36,29,500 Equity Shares in the ratio of 17 bonus Equity Shares against one Equity Share held by the existing shareholders, details of which are mentioned herein below:

Sr. No.	Name of Subscribers	No. of Shares Subscribed	Face Value per share (₹)
1.	Sanjay Gupta	20,55,606	10
2.	Sooraj Gupta	15,73,894	10
Total		**36,29,500***	**-**

** (1) The Company issued bonus shares in the ratio of 17 Equity Shares for every one Equity Share held, resulting in the allotment of 36,29,500 fully paid-up Equity Shares on May 18, 2024, aggregating to ₹ 362.95 Lakhs, by capitalizing the Securities Premium Account. The Securities Premium was generated pursuant to the acquisition of the businesses of M/s SR Fabrics, M/s SG Trader, and M/s Neelmadhav Textiles at their respective book values. Out of the total addition of ₹ 386.65 Lakhs to the Securities Premium Account arising from these acquisitions, the Company utilized ₹ 384.30 Lakhs for the issuance of bonus shares. The bonus shares were issued out of general reserves in the nature of the Securities Premium Account of the Company, in accordance with Section 52(2)(a) of the Companies Act, which permits the application of securities premium account towards the issue of unissued shares of the Company to its members as fully paid bonus shares. Accordingly, there was no statutory requirement to conduct an interim audit of the Company's financial statements for such issuance.*

(2) The ratio of 17:1 was determined based on the available balance in the Securities Premium Account amounting to ₹ 386.65 Lakhs, which, in accordance with Section 52 of the Companies Act, can be utilised, inter alia, for the purpose of issuing fully paid bonus shares to members. The ratio was further determined by the Company's internal management to align the Company's capital structure with the expanded scale of operations and strategically increase the number of shares held by the Promoters, Sanjay Gupta and Sooraj Gupta, without altering their percentage shareholding, while creating a larger equity base to support the Company's future capital raising initiatives, including the private placement undertaken on June 01, 2024 and this Issue. Further, the issuance of bonus shares strengthened the Company's capital structure and increased the number of outstanding Equity Shares, which is generally considered beneficial from a market perspective as it improves share liquidity and makes the equity more accessible to investors. Since the bonus shares were issued on a proportionate basis to all existing shareholders, the Promoters' (Sanjay Gupta and Sooraj Gupta) percentage shareholding remained unchanged, while their absolute shareholding increased in line with the enlarged capital base.

(d) Issue of 2,52,000 Equity Shares of face value of ₹ 10/- on private placement basis, details of which are mentioned herein below:

Total		**2,52,000***	**-**

** The valuations adopted for the allotments pursuant to business takeovers on May 15, 2024 and the private placement on June 01, 2024 are fundamentally different due to the nature, structure and commercial context of the two transactions. The business takeover valuation was determined for the purpose of acquisition of proprietorship businesses and issuance of shares to the Promoters, Mr. Sanjay Gupta and Mr. Sooraj Gupta, as consideration for transfer of running businesses and was based on intrinsic business value assessed by a registered valuer vide their valuation report dated April 30, 2024. In contrast, the private placement on June 01, 2024 was a cash-based transaction with independent third-party investors and was priced after considering prevailing market conditions, investor risk-return expectations, liquidity and marketability factors, and commercial negotiations. Further, between the business takeover date and the private placement date, the Company had achieved corporate consolidation of the acquired businesses into a single entity, thereby improving structural clarity, governance framework and scalability of operations, which materially enhanced investor perception and confidence. The Company also presented a clearer growth roadmap, financial models to prospective investors, which positively impacted valuation expectations. The private placement price therefore reflected a market-discovered price based on external investor assessment of the Company's future growth potential and risk profile, rather than merely historical performance. The Company has obtained valuation report for the private placement from a registered valuer dated May 18, 2024. Hence, the variation in price highlights the transition of the Company from a business acquisition phase to a growth capital phase, where valuation was determined by independent investor appetite, strengthened corporate structure and enhanced growth visibility.*

Objectives of Capital Expenditure towards Setting up of an Office-cum-Godown

- **Operational Efficiency:** An integrated office-cum-godown space will streamline the Company's key functions by enabling closer coordination between administrative, sales, and storage operations. This will improve response time to customer orders, enhance inventory control, and support faster decision-making, thereby strengthening overall operational efficiency.

- **Supply Chain Control:** As the Company is engaged in manufacturing and wholesale distribution of denim fabrics, having a dedicated godown facility under its ownership will allow for better handling, organized storage, and timely dispatch of fabric rolls. This level of control is critical to ensuring consistent service quality and customer satisfaction.

- **Support for Business Growth:** With increasing sales volumes and expanding customer base across multiple states, an owned office-cum-godown will provide the necessary physical infrastructure to support current operations and future scale-up. It will serve as a central hub for managing distribution, stock movement, and sample logistics.

- **Cost Optimization:** Acquiring an office-cum-godown will reduce the Company's recurring outflow towards rent, which currently forms a notable portion of operating expenses. The savings generated from avoiding monthly rent payments can be redirected towards core business needs such as working capital, production enhancement, or market expansion. This shift from rental to ownership is expected to strengthen the Company's financial efficiency over the long term.

The token amount of ₹ 0.50 Lakhs was paid by the Company to the Sellers on July 14, 2025, and the balance amount of ₹ 449.50 Lakhs was to be paid by the Company to the Sellers by January 22, 2026. The total remaining amount of ₹ 449.50 Lakhs shall be paid simultaneous to the execution of the registered sale deed for the said property agreed to be sold.

Government and Other Approvals

In relation to the proposed office-cum-godown, we are required to obtain certain approvals, which are routine in nature, from certain governmental or local authorities, the status of which is provided below:

Sr. No.	List of Approvals	Stages when it is required
1.	Registration under the Delhi Shops and Establishments Act, 1954	Post purchase of property and before starting operations
2.	Insertion of "additional place of business" in GST registration certificate for the state of Delhi	Post purchase of property and before starting operations

3.	Trade license under the Delhi Municipal Corporation Act, 1957	Post purchase of property and before starting operations

Our Company shall submit necessary applications for obtaining these approvals, as applicable, at the relevant stages of setting up the office-cum-godown space in accordance with applicable laws.

2. To Meet Working Capital Requirements

Our Company is engaged in the manufacturing of denim fabrics through third-party manufacturing arrangements, limited self-manufacturing through leased machinery, and wholesale distribution of grey and finished denim fabrics across various markets in India. The nature of our operations requires significant working capital investment to support procurement of raw materials, manufacturing and processing expenses, inventory holding, logistics, and trade receivables. Our manufacturing activities involve upfront expenditure towards procurement of cotton yarn, dyes and chemicals, job-work charges payable to third-party manufacturers, finishing costs, and inspection and logistics expenses. In addition, our wholesale distribution business requires maintenance of adequate inventory of grey and finished denim fabrics to meet customer demand across key markets such as Delhi, Uttar Pradesh, Gujarat, Haryana and Rajasthan. Payments from customers are generally received over a credit period in line with industry practices, which results in funds being locked in trade receivables.

Further, as part of our business expansion and value chain integration strategy, the Company has recently established a limited self-manufacturing line through leased machinery. While commercial operations from this facility are yet to commence in full, the scaling-up of such operations is expected to increase working capital requirements due to incremental raw material procurement, work-in-progress inventory, utilities, manpower, and operating overheads.

Accordingly, our business is working capital intensive and requires continuous access to adequate liquidity to ensure smooth manufacturing and trading operations.

Expected Business Growth

The Company operates in the denim fabric segment through a combination of trading activities and manufacturing arrangements undertaken through third party job workers and leased loom machineries. This operating model enables the Company to scale its procurement and supply volumes in line with market demand without requiring significant capital expenditure towards setting up large manufacturing facilities. As a result, the Company has the operational flexibility to increase the volume of denim fabrics traded and manufactured through its existing network of suppliers, distributors and job work partners.

The projected growth is also supported by the proposed augmentation of working capital from the proceeds of the Issue. Availability of additional working capital is expected to enable the Company to procure higher quantities of raw materials and finished denim fabrics, maintain adequate inventory levels and execute larger and more frequent purchase orders from customers. This will allow the Company to service higher sales volumes and improve operational throughput.

Further, the Company intends to strengthen its presence in the denim fabric market by increasing its engagement with existing customers while also expanding its customer base. With improved inventory availability, efficient logistics through the proposed office-cum-godown facility and continued sourcing from established suppliers and manufacturing partners, the Company expects to enhance its ability to cater to repeat orders as well as new customer requirements. The projections have therefore been prepared considering the Company's current scale of operations, expected increase in procurement and sales volumes, improved working capital position and the Company s ability to leverage its flexible sourcing and manufacturing model. Accordingly, the Company believes that the projected growth for the forecast period is achievable and supported by the above operational and business factors.

Additionally, the Indian economy is expected to continue to demonstrate resilient growth momentum over the medium term, supported by strong domestic consumption, public infrastructure spending, and recovery in manufacturing activity. The textile and apparel sector, including the denim fabric segment, is expected to benefit from improving demand conditions, increasing penetration of organised retail, stabilisation in cotton and input prices, and enhanced supply chain efficiencies. Our Company's revenue from operations has shown growth over the past financial years, supported by expansion of wholesale distribution, diversified sourcing through third-party manufacturing arrangements, and growing acceptance of our products across key domestic markets. Further, the Company's initiative to partially integrate manufacturing through leased self-production facilities, while continuing to leverage third-party manufacturers, is expected to improve operational efficiency and provide better control over product quality and timelines. With the anticipated growth in domestic textile demand and expansion of our operations, we expect sustained growth in our business, which will result in higher working capital requirements on account of increased raw material procurement,

inventory holding, and trade receivables. Accordingly, the Company proposes to utilise a portion of the Net Proceeds of the Issue towards funding its incremental working capital requirements, which is expected to support business growth and strengthen its operational capabilities.

Existing Working Capital Requirements

Our Company presently funds its working capital requirements through a combination of internal accruals and short-term borrowings from banks and financial institutions. As on June 30, 2026, our Company has sanctioned fund-based based working capital of ₹ 1,000 Lakhs facilities from its bankers, which are utilised to finance inventory procurement, meet manufacturing and processing expenses, manage receivables, and support day-to-day operations.

For details of the existing working capital facilities availed by our Company, see "***Financial Indebtedness***" on page no. 234 and "***Restated Financial Statements***" on page no. 180 of this Prospectus.

Requirement of Incremental Working Capital

With the anticipated growth in operations, expansion of distribution footprint, gradual stabilisation of self-manufacturing activities, and higher scale of procurement and sales, the working capital requirements of our Company are expected to increase. Factors contributing to incremental working capital needs include:

i. higher procurement of cotton yarn and processing inputs;
ii. increased inventory holding of grey and finished denim fabrics to support expanded sales volumes;
iii. extended receivable cycles arising from increased level of self-manufacturing activities;
iv. job-work and processing expenses payable to third-party manufacturers; and
v. operating expenses associated with the commencement and ramp-up of leased self-manufacturing facilities.

Proposed Utilisation of Net Proceeds towards Working Capital

Accordingly, our Audit Committee, pursuant to a resolution dated August 14, 2026, has taken note that a portion of the Net Proceeds of the Issue is proposed to be utilised towards funding the incremental working capital requirements of the Company.

We propose to utilise an aggregate amount of ₹ 1,150.00 Lakhs out of the Net Proceeds towards funding the working capital requirements of our Company. The proposed utilisation will primarily be towards financing inventory, trade receivables, manufacturing and processing expenses, and other operating requirements in the ordinary course of business.

The deployment of funds towards working capital is proposed to be undertaken over FY 2026-27, in line with the projected growth in operations. Our Company proposes to utilise ₹ 1,150 Lakhs in FY 2026-27 out of the Net Proceeds towards funding its incremental working capital requirements.

Further, for risks in relation to use of the Net Proceeds for funding working capital requirement of our Company, see *"**Risk Factors - Our operations are subject to high working capital requirements. Our inability to maintain an optimal level of working capital required for our business may impact our operations adversely**."* on page no. 28 of this Prospectus.

Justification for "Holding Period" Levels

Inventories	As on March 31, 2024, the Company maintained average inventory holding of 59 days, with inventory levels of ₹ 769.51 Lakhs. These levels reflected normal stocking of raw materials and finished goods in line with the trading and manufacturing cycle. As on March 31, 2025, inventory increased to ₹1,069.12 Lakhs, with average holding days increasing to 77 days. This increase was primarily on account of higher procurement of raw materials and finished fabrics to support growth in sales volumes and to maintain buffer stock to mitigate supply chain uncertainties.

	For the Financial Year ended March 31, 2026, inventory stood at ₹1,685.86 Lakh, with estimated average holding days of 102 days, aligned with higher operational scale, continued self-manufacturing activities, and prudent buffer stocking of raw materials and finished goods. For FY 2026–27, inventory is projected to increase to ₹ 1,951.00 Lakhs, while average holding days are expected to stabilize to 72 days due to improved demand forecasting, better production planning, and optimisation of inventory management processes. As a manufacturing company, our operations involve procurement of raw materials like yarn, dye chemicals, and accessories, and maintaining work in progress ("WIP") and finished goods stock. The inventory cycle includes raw material storage, production lead time, quality checks, and dispatch logistics. The Company has adopted a strategy of proactive stocking to avoid supply disruptions and ensure timely fulfilment of orders, particularly in high-demand periods. Hence, an inventory holding period of around 70 - 80 days is justified and consistent with operational requirements.
Trade Receivable Days	As on March 31, 2024, trade receivables increased marginally to ₹448.59 Lakhs; however, average receivable days reduced significantly to 39 days due to tighter credit controls. As on March 31, 2025, trade receivables increased to ₹858.04 Lakhs, with average receivable days of 49 days, mainly due to higher sales to wholesale and bulk customers with standard industry credit terms. As on March 31, 2026, trade receivables increased by ₹ 121.87 Lakhs. The increase in trade receivables is in line with the higher revenue achieved during FY 2025-26. The average collection period rose by 10 days, from 49 days in the previous year, resulting in a higher receivable balance outstanding as at March 31, 2026. For FY 2026 - 27, trade receivables are projected at ₹1,900.00 lakh, with receivable days expected to improve to 57 days, supported by strengthened receivable monitoring and improved liquidity position. The company aims to maintain this level through focused receivables monitoring and digital tracking of outstanding dues.
Short Term Loans & Advances	As on March 31, 2024, short-term loans and advances stood at ₹ 9.15 Lakhs, reflecting limited advances in the initial phase of operations. As on March 31, 2025, the balance increased to ₹ 29.08 Lakhs due to higher advance payments to suppliers in line with business growth. As on March 31, 2026, short-term loans and advances increased by ₹476.49 Lakhs. The increase is primarily attributable to the reclassification of the property-acquisition advance from non-current to current, based on its expected realisation within the next twelve months. The movement therefore reflects a balance sheet reclassification and not an additional cash outflow during the year. For FY 2026–27, the balance is projected at ₹ 650.00 Lakhs, consistent with expanded operations and prudent advance procurement strategy. The short-term loans and advances mainly consist of vendor advances and staff claims. These balances are directly proportional to the

	company's operational volume. The projected balance is consistent with the scale of operations and prudent business planning as business activity grows.
Other Current Assets	As on March 31, 2023 and March 31, 2024, Other Current Assets stood at ₹8.78 Lakhs and ₹17.30 Lakhs, respectively. As on March 31, 2025, the balance increased to ₹31.95 Lakhs due to growth in operations and higher prepaid expenses and advance tax. For the Financial Year ended March 31, 2026, Other Current Assets increased significantly to ₹ 69.96 lakh, primarily due increase in prepaid expenses, which relates to IPO Expenses. For FY 2026–27, Other Current Assets are projected at ₹ 120.43 Lakhs, in line with further increase in profits and business scale. The other current assets mainly consist of advance tax, TDS credits. These balances are directly proportional to the company's higher profitability and tax obligations. As business activity grows, advance tax provisioning and statutory compliance levels also increase. Thus, the projected balance is consistent with the scale of operations and prudent business planning.
Trade Payables	As on March 31, 2023, trade payables stood at ₹410.01 Lakh, with average payable days of 86 days, reflecting standard supplier credit. As on March 31, 2024, trade payables increased to ₹496.20 Lakh, while average payable days reduced to 42 days due to improved liquidity and early payments. As on March 31, 2025, trade payables increased to ₹926.99 Lakh, with average payable days of 56 days, in line with higher procurement volumes. For the Financial Year ended March 31, 2026, trade payables stood at ₹ 426.87 Lakhs, with payable days of 45 days. For FY 2026–27, trade payables are projected at ₹ 1,215.35 Lakhs, with payable days reducing to 32 days, supported by improved liquidity and focus on timely vendor settlements. The company sources raw materials from domestic and regional suppliers, and credit terms typically range from 30 to 60 days. To maintain production efficiency and bargaining power, a balanced approach to payment cycles is adopted.
Other Current Liabilities	As on March 31, 2023, Other Current Liabilities stood at ₹2.84 Lakh. As on March 31, 2024 and March 31, 2025, the balances stood at ₹14.15 Lakh and ₹11.37 Lakh, respectively. For the Financial Year ended March 31, 2026, Other Current Liabilities stood at ₹ 31.14 Lakhs and For FY 2026-2027 it is projected at ₹ 28.24 Lakh, in line with growth in operations and statutory obligations.
Short Term Provisions	Short-term provisions mainly comprise provision for income tax and employee-related provisions. As on March 31, 2023, short-term provisions stood at ₹14.20 Lakh. As on March 31, 2024 and March 31, 2025, provisions increased to ₹72.19 Lakhs and ₹98.86 Lakh, respectively, reflecting increased profitability. For the Financial Year ended March 31, 20256, short-term provisions stood at ₹ 239.57 Lakhs. For FY 2026–27, provisions are projected to decrease to ₹ 166.66 Lakhs, on projected decrease in provision of income tax which is in line with projected operations of the Company.

2.1. Ageing of Trade Receivables as a Percentage of Revenue from Operations

The trade receivables as a percentage of the revenue from operations for FY 2023-24, 2024-25 and FY 2025-26 is as follows:

Period	Trade Receivable (*₹ in Lakhs*)	% of Revenue from Operations
FY 2023-24	448.59	11.41%
FY 2024-25	858.04	17.51%
FY 2025-26	979.91	17.24%

The restated trade receivable as well as projected trade receivable are in the normal course of business and are in line and consistent with the previous ongoing operation of the Company.

All fluctuations primarily reflect changes in the scale of operations, sales growth, and customary credit terms extended to customers. The projected trade receivables have been estimated on the basis of revenue from operations for FY 2026–27, taking into consideration historical collection patterns, existing customer relationships, and standard credit periods offered to manufacturers, distributors, dealers and wholesalers.

2.2. Ageing of Trade Payables as a Percentage of Revenue from Operations

The trade payables as a percentage of the revenue from operations for FY 2023-24, 2024-25 and 2025-26 is as follows:

Period	Trade Payable (*₹ in Lakhs*)	% of Revenue from Operations
FY 2023-24	496.20	12.62%
FY 2024-25	926.99	18.92%
FY 2025-26	426.87	7.51%

All fluctuations in the restated trade payables, as well as the projected trade payables, are in the normal course of business and are primarily attributable to changes in the scale of operations and procurement volumes. The projected trade payables have been estimated based on anticipated purchase requirements, historical payment trends, and the credit terms availed from suppliers in the ordinary course of business. Apart from the Financial Year 2024-2025, only minor fluctuations have been observed, which are within a range of management expectations and do not involve any material change in the Company's credit policy or supplier arrangements.

The Company follows a disciplined approach towards the timely settlement of its dues to suppliers, with the objective of ensuring uninterrupted production cycles, fostering long-term supplier relationships and preserving its bargaining power. This approach enables the Company to maintain a reliable supply chain, secure favourable procurement terms and sustain operational efficiency. In line with this approach, trade payables as a percentage of projected revenue from operations are estimated at 10.42% for FY 2026–27, representing the lowest projected level since FY 2022-2023. Correspondingly, trade payable days are expected to reduce to approximately 37 days in FY 2026–27, reflecting improved payment discipline and efficient working capital management.

Rationale for increase in the proposed working capital gap

The working capital gap of the Company increased from ₹ 950.97 Lakhs as at March 31, 2025 to ₹ 2,093.23 Lakhs as at March 31, 2026. The increase is primarily attributable to the higher level of business activity during the period, which resulted in an increase in inventory, trade receivables and short-term loans and advances. These changes have arisen in the ordinary course of business and are consistent with the Company's operating cycle, procurement practices and credit terms followed in the industry.

During the period from April 01, 2025 to March 31, 2026, the Company recorded sales of ₹ 5685.11 Lakhs. With the increase in sales and procurement activities during the period, certain working capital components such as inventory and receivables also increased. The Company operates in the textile and denim fabric segment, where maintaining adequate inventory levels and extending customary credit terms to customers are necessary for smooth business operations. Accordingly, the movement in working capital during the period reflects the operational requirements associated with the scale of business activity.

The Company's inventory increased from ₹1,069.12 Lakhs as at March 31, 2025 to ₹ 1,685.86 Lakhs as at March 31, 2026. In addition, the Company purchased stock-in-trade during the said period amounting to ₹ 4417.04 Lakhs, of which ₹ 1,189.67 Lakhs remained in inventory at the end of the period after accounting for sales. In the denim fabric industry, maintaining sufficient levels of raw materials and finished goods is necessary to ensure continuity in

production and timely supply to customers. The level of inventory as at March 31, 2026 is therefore aligned with the Company's procurement and sales activities during the period.

The Company's trade receivables increased from ₹858.04 Lakhs as at March 31, 2025 to ₹979.91 Lakhs as at March 31, 2026. This increase corresponds with the sales achieved during the said period. In the textile and denim fabric industry, customers such as garment manufacturers, exporters and trading houses are typically extended credit as part of standard commercial practice. The Company generally provides credit periods ranging between 60 to 120 days, depending on the nature of the customer relationship and commercial terms. The receivable levels as at March 31, 2026 are therefore consistent with the Company's sales during the period and the credit terms extended in the normal course of business.

Further, short-term loans and advances increased from ₹29.08 Lakhs as at March 31, 2025 to ₹55.07 Lakhs *(Excluding capital advances of ₹450.50 lakhs relating to property, which were earlier classified as non-current advances)* as at March 31, 2026. The increase is mainly due to advances paid to suppliers for the procurement of raw materials and stock-in-trade. Such advances are made in the normal course of procurement to ensure timely availability of materials and continuity of supply. This practice also helps the Company maintain stable supplier relationships and avoid delays in procurement.

Overall, the increase in the working capital gap during the period ended March 31, 2026 reflects the higher level of business operations and procurement activities during the period. The increase in inventory, trade receivables and advances to suppliers is operational in nature and consistent with the Company's business model, operating cycle and prevailing practices in the textile industry.

Justification for Increase in Revenue for FY 2026-27

a. Organic Growth in Existing Markets

The Company expects to achieve approximately 20% growth within its existing customer base and established markets. This steady growth, driven by improved product offerings and deeper engagement with current clients, is projected to contribute ₹ 1200.00 Lakhs to the total revenue increase.

b. Strategic Expansion into North Indian Textile Hubs

A significant portion of the projected growth approximately of ₹ 2400.00 Lakhs is expected to be generated from the Company's expansion into the Delhi, Uttar Pradesh, and Rajasthan markets. These regions are recognized as well-established textile trading hubs.

i. **Delhi: Strategic Infrastructure and Market Deepening:** The Company is strategically focusing on the Delhi region, particularly leveraging its presence in Gandhi Nagar, which is recognized as one of the largest textile wholesale markets in Asia. To support its expansion, the Company intends to utilize a portion of its Issue Proceeds to acquire a specialized office-cum-godown facility in this hub to integrate administrative, sales, and storage functions under one roof. This integrated presence is expected to strengthen the Company's operational efficiency and enhance its ability to capture opportunities across other fabric and garment markets in Delhi, including Tank Road Jeans Market, Shyam Block, Raghubir Nagar Wholesale Garment Market, and Uttam Nagar. Given the Company's wholesale model, growth is primarily driven by the expansion of its reach; therefore, the Company is currently in the process of identification and appointment of additional distributors to capitalize on the region's strong momentum, which has seen cumulative revenue grow at a CAGR of more than 35%. Through these targeted distributor appointments and the enhanced operational efficiencies provided by the new central hub, the Company aims to significantly increase its market penetration, which is estimated to generate approximately ₹ 1100.00 Lakhs in additional revenue.

ii. **Uttar Pradesh: Regional Scaling and Supply Chain Integration:** The Company is actively engaged in the identification, evaluation, and appointment of a wider distributor network to deepen its reach across the state's key trading centers. This regional expansion is directly supported by the Company's proposed infrastructure in neighboring region Delhi, which will ensure organized storage, better handling, and timely dispatch, thereby maintaining consistent service quality as the Company penetrates deeper into the Uttar Pradesh market. The Company expects that the onboarding of new distributors and improved supply chain control will translate into meaningful volume growth, contributing approximately ₹ 800 Lakhs in additional revenue. Presently, the Company operates in Faridabad and Ghaziabad and is actively planning to expand its presence into Sadar Bazaar and Suraj Kund Market. The Company also intends to strengthen its footprint across key markets in Delhi NCR, including Sadar Bazaar, Railway Road Market, Sadar Bazar, and NIT Market.

iii. **Rajasthan:** The Company is also focusing its expansion efforts on the Rajasthan market, with a specific emphasis on Bhilwara, which is widely recognized as the "*Textile City of India*". To leverage this established textile ecosystem, the Company is actively engaged in the identification, evaluation, and appointment of new distributors and is currently in discussions with multiple potential partners. Building on its existing presence, the Company expects to add two to five new distributors in the region by March 2027. This expansion is further supported by the Rajasthan One District One Product ("ODOP") Policy 2024, which has created a highly favorable regulatory environment for growth within the textile sector. Given the Company's wholesale model, it anticipates that capturing even a modest 0.5–1% market share in a major hub like Bhilwara will generate approximately ₹ 5.00 Lakhs in additional revenue.

c. Gujarat

The Company is strategically focusing its expansion efforts on the Gujarat market, particularly on Surat region, which is widely recognized as the "*Textile Hub of India*". To capitalize on the region's well-established textile and trading ecosystem, the Company is actively identifying, evaluating, and onboarding new distribution partners and is currently in advanced discussions with multiple prospective distributors.

Leveraging its existing market presence, the Company plans to appoint three to six additional distributors in the region by March 2027. This expansion strategy is further supported by the Gujarat Industrial Policy 2020 and the Gujarat Textile Policy 2024, which provides a conducive regulatory framework and incentives for growth in the textile sector.

The Company's projected revenue growth is underpinned by a multifaceted execution strategy. By balancing a steady 20% organic growth in existing markets with an aggressive expansion into the high-potential textile hubs of Delhi, Uttar Pradesh, and Rajasthan, the Company has established a diversified path to achieving its targets.

1. Overview of Global and Indian Economy

1.1. Global Macroeconomics Overview

Global growth is slowing due to a substantial rise in trade barriers and the pervasive effects of an uncertain global policy environment. Growth is expected to weaken to 2.3 percent in 2025, with deceleration in most economies relative to last year. This would mark the slowest rate of global growth since 2008, aside from outright global recessions. In 2026-27, a tepid recovery is expected, leaving global output materially below January projections. Progress by emerging market and developing economies (EMDEs) in closing per capita income gaps with advanced economies and reducing extreme poverty is anticipated to remain insufficient. The outlook largely hinges on the evolution of trade policy globally. Growth could turn out to be lower if trade restrictions escalate or if policy uncertainty persists, which could also result in a build-up of financial stress. Other downside risks include weaker-than-expected growth in major economies with adverse global spillovers, worsening conflicts, and extreme weather events.

On the upside, uncertainty and trade barriers could diminish if major economies reach lasting agreements that address trade tensions. The ongoing global headwinds underscore the need for determined multilateral policy efforts to foster a more predictable and transparent environment for resolving trade tensions, some of which stem from macroeconomic imbalances. Global policy efforts are also needed to confront the deteriorating circumstances of vulnerable EMDEs amid prevalent conflict and debt distress, while addressing long-standing challenges, including the effects of climate change. National policy makers need to contain risks related to inflation as well as strengthen their fiscal positions by raising additional domestic revenues and re-prioritizing spending. To facilitate job creation and boost long-term growth prospects in EMDEs, reforms are essential to enhance institutional quality, stimulate private investment growth, develop human capital, and improve labor market functioning.

SUMMARY

After being buffeted by a series of adverse shocks over 2020-24, the global economy is facing another significant headwind this year, with increased trade barriers and heightened policy uncertainty leading to a notable deterioration of the outlook relative to January (figure 1.1.A). In particular, global output is expected to grow at its weakest pace since 2008, aside from outright global recessions (figure 1.1.B). The sharp increase in tariffs and the ensuing uncertainty are contributing to a broad-based growth slowdown and deteriorating prospects in most of the world's economies (figure 1.1.C). Subdued global growth prospects are unlikely to improve materially without policy actions to address increasing trade restrictions, geopolitical tensions, heightened uncertainty, and limited fiscal space. The global outlook is predicated on tariff rates close to those of late May prevailing throughout the forecast horizon. Accordingly, pauses to previously announced tariff hikes between the United States and its trading partners are assumed to persist. This baseline nonetheless entails the highest U.S. average effective tariff rate in nearly a century. In addition, in view of recent rapid shifts in trade policies and the potential for a return to even higher tariffs, consumers and businesses continue to grapple with unusually elevated uncertainty (figure 1.1.D). In this context, a prospective recovery in global trade and investment—two important drivers of long-term development that have been relatively subdued in recent years—has been disrupted. Commodity prices plunged in early April in response to deteriorating growth prospects. Oil prices posted an especially large decline, with the effects of a notable hike in oil production by OPEC+ nations compounded by a muted outlook for oil demand growth (figure 1.1.E). Base metal prices also dropped as markets priced in substantial headwinds to global manufacturing and industrial activity but have since partially recovered. Overall commodity prices are forecast to decline by 10 percent in 2025, softening further in 2026—mainly due to falling oil prices.

Global headline inflation generally remains elevated relative to central bank targets and pre pandemic averages and has even risen in some advanced economies since late last year. Slower d is inflation globally over the last six months has largely reflected continuing inflationary pressures from services prices. The recent rise in consumer inflation

expectations has been influenced by the implementation of trade restrictions. In addition, core inflation in some economies is expected to remain high due to persistent services price increases. In all, GDP-weighted global inflation is projected to average 2.9 percent in 2025 and 2026—still a little above the average inflation target—but with notable heterogeneity across economies.

Global financial conditions have been tighter this year, on average, relative to late 2024, principally reflecting trade policy uncertainty. Volatility in financial markets spiked and equity markets plunged globally as trade tensions escalated in early April; however, asset prices largely recovered after an initial 90-day tariff pause was announced and following the rollback in U.S.-China tariffs in May (figure 1.1.F). Long-term government bond yields in major advanced economies have increased since late last year, albeit with pronounced volatility. EMDE financial conditions are also somewhat tighter, on average, relative to late last year. In early April, many EMDEs saw sharp declines in equity markets amid a surge in capital outflows. Sovereign spreads rose, albeit to differing degrees based on economies' exposure to announced trade barriers. Nevertheless, EMDE equity markets regained ground and spreads narrowed again following the partial de-escalation in trade tensions.

Global trade

Global trade conditions experienced a large shock in early April when the United States announced prospective tariffs on most trading partners, with rates proportional to bilateral goods trade deficits, in addition to previously announced tariffs. A sharp escalation of trade barriers between China and the United States followed. Subsequently, country-specific tariffs were reduced to a universal 10 percent—including in the case of China, with initially prohibitively high tariff rates being rolled back sharply in May. However, other tariff increases remain on China and other large trade partners. As a result, the effective U.S. tariff rate has been brought to levels not seen in almost a century (figure 1.3.A). Tariff rates in effect as of May 27 are assumed to prevail throughout the forecast period, but there is notable uncertainty in this regard. The baseline projections for global trade also incorporate important carve-outs for USMCA-compliant goods, pharmaceuticals, semiconductors, bullion, energy, copper, and other critical minerals, as well as retaliatory measures in place as of late May.

However, other tariff increases remain on China and other large trade partners. As a result, the effective U.S. tariff rate has been brought to levels not seen in almost a century (figure 1.3.A). Tariff rates in effect as of May 27 are assumed to prevail throughout the forecast period, but there is notable uncertainty in this regard. The baseline projections for global trade also incorporate important carve-outs for USMCA-compliant goods, pharmaceuticals, semiconductors, bullion, energy, copper, and other critical minerals, as well as retaliatory measures in place as of late May.

Shifting policy announcements have led to heightened global trade policy uncertainty, measures of which reached historical highs over the past few months (figure 1.3.B). This reflects uncertainty over whether current tariff rates will endure, their implementation, and the scale and timing of potential retaliatory responses. New tariff measures mark an intensification of the upward trend in trade-restrictive measures seen in recent years, with a significant risk of further escalation in trade barriers, as announced policies could generate substantial spillovers to third markets. These markets may respond by adopting protectionist measures to shield domestic industries from a surge in imports. Prior to the recent tariff announcements, growth in global goods trade had accelerated at the turn of the year, partly reflecting inventory build-ups in anticipation of changes in trade policy in major economies (figure 1.3.C). The growth in goods trade has been relatively widespread, albeit with the pace of expansion in advanced economies exceeding that in EMDEs. Likely driven by the rush to front-load imports before tariffs took effect, the global new export orders manufacturing PMI subindex briefly entered expansionary territory in March, signaling temporary improvements in goods trade, before falling in April to its lowest level in 20 months. Global services trade growth has flattened out after several years of recovery from the pandemic, with travel activity approaching pre-pandemic levels. The stabilization in services trade is also reflected in the continued softening of the expansion in the global services PMI. Global trade growth in goods and services is projected to slow sharply in 2025, to 1.8 percent, from 3.4 percent in 2024 (figure 1.3.D). The forecast has been revised down by 1.3 percentage points since January, reflecting changes in trade policies in key economies and higher trade policy uncertainty. Increased tariffs are expected to weigh on global trade over the forecast horizon. In tandem with the projected pickup in global growth, trade growth is nonetheless forecast to firm from a feeble pace this year, reaching 2.4 percent in 2026 and 2.7 percent in 2027—still well below its pre-pandemic average of 4.6 percent. The forecast for global trade growth masks significant heterogeneity. Countries with greater export exposure to EMDE markets are projected to recover more rapidly than those more reliant on advanced economies, though elevated policy uncertainty and weakening demand could weigh on the recovery more broadly. The outlook for global trade is subject to substantial downside risks, notably a renewed escalation of trade restrictions. Even absent further escalation, a related risk is that uncertainty about trade and other policies could slow investment, an import-intensive component of GDP, dampening trade more than anticipated.

Global inflation

Global headline consumer price inflation has remained elevated above pre-pandemic norms over the past year, briefly edging higher in some advanced economies in early 2025 (figure 1.5.A). Continued tightness in labor markets has kept core inflation at a somewhat elevated level in many economies. In EMDEs, monthly headline inflation readings were volatile earlier this year, with a pickup in core inflation partly reflecting rising services prices and wage pressures.

The outlook for global inflation has become more uncertain since last year due to a combination of shocks. Most notably, substantial tariff hikes are set to exert upward pressure on consumer inflation in key economies by raising prices for imported consumer goods and inputs into production and redirecting demand toward domestic production that is relatively inelastic in the short run (Barbiero and Stein 2025). Indeed, manufacturing purchasing managers in advanced economies have already reported accelerating input and output prices so far this year (figure 1.5.B). Even so, outside economies where import duties have significantly increased, higher trade barriers are likely to be generally deflationary as they weaken external demand. There may nevertheless be other upside risks to inflation in these economies that are indirectly associated with trade restrictions. These include the potential for damage to global supply chains to push up prices in unpredictable ways, and the possibility of sizable currency depreciations.

Inflation expectations, particularly at the shorter horizon, have picked up in 2025, mainly in some major economies (figure 1.5.C). This is likely explained by the expected impact of tariff increases on consumer prices, even as trade tensions weigh on economic activity and commodity prices. Persistent underlying inflationary pressures, coupled with the impact of rising tariffs and trade-protectionist measures, are anticipated to delay the normalization of global inflation to levels broadly consistent with inflation targets. On a GDP weighted basis, global inflation is projected to average 2.9 percent in both 2025 and 2026, before easing to 2.5 percent in 2027—about in line with the average inflation target. However, there is significant heterogeneity across countries, with inflation projections revised slightly lower in EMDEs in 2025 due to the impact of weaker demand for traded goods, while being revised significantly higher in advanced economies, primarily the United States (figure 1.5.D).

Per capita income growth

Per capita GDP in many EMDEs is on a trajectory that implies a very slow pace of convergence with advanced-economy incomes, with the recent deterioration in external conditions hindering progress. This comes on top of an incomplete recovery from the pandemic, combined with an escalation of conflict in some economies, all of which have slowed the pace of poverty reduction and hampered per capita income catch-up. Per capita income growth in EMDEs over 2025-27 is projected to be 2.9 percent—about 1.1 percentage point below its 2000-19 average. Excluding China and India, both key drivers of income convergence over the forecast horizon, per capita income growth is expected to be even slower, at 1.8 percent over 2025-27. Across numerous LICs and FCS—many of which have large gaps in per capita income with other EMDEs and advanced economies—per capita income growth is projected to be lower still, contributing to slowing progress in poverty reduction. Moreover, absent the rapid economic growth and supportive policies needed to spur job creation, many EMDEs will continue to struggle to lift incomes and thus reduce poverty in the coming years. In level terms, per capita income in EMDEs is estimated to remain nearly 5 percent below prepandemic trends in 2025, compared to marginally above for advanced economies, with the gap on track to widen through 2027 (figure 1.10.A). Indeed, most EMDEs are in a notably worse position in terms of output losses relative to the pre-pandemic trend, compared to advanced economies, given their weaker initial recoveries. This has been exacerbated further by the deteriorating outlook for global growth amid increasing uncertainty and rising trade restrictions, as well as by limited policy space. Excluding China and India, progress in closing the gap in income levels with advanced economies has stalled since the early 2010s and is envisaged to remain stagnant (figure 1.10.B). In LICs, per capita growth is expected to pick up over the forecast horizon but remain too slow to make up for ground lost since the pandemic. Indeed, despite LICs' comparatively lesser exposure to increased trade tensions, their recovery in per capita income is projected to be slower than was anticipated in January's forecasts, with softer global commodity demand and subdued investor confidence weighing on the outlook this year and next. FCS countries continue to fare much worse than was foreseen in the 2010s, as conflict has become an increasingly prominent driver of per capita output losses. Since the early 2000s, the number of conflicts and conflict-related deaths has risen substantially (figure 1.10.C). As a result, by 2027, per capita incomes in FCS are projected to remain over 11 percent lower than the prepandemic trend, compared to about 4 percent for LICs as a whole (figure 1.10.D). After considerable headway in reducing extreme poverty rates until the 2010s, moderating per capita income growth across EMDEs has slowed progress on poverty reduction (figure 1.10.E). While some regions, such as SAR, have made notable reductions in extreme poverty, the extreme poverty rates in EMDEs excluding China and India, and especially across LICs—many of which are FCS economies—are expected to remain higher than prior to the pandemic through 2026. Slowing progress on poverty reduction has coincided with an intensification in conflict since the mid-2010s. As of 2025, FCS, which are home to nearly 1.1 billion people, account for nearly half of the global population living in extreme poverty, up from about 40 percent in 2019. By 2030, almost 60 percent of the world's poor, or 365 million people, are expected to reside in FCS (figure 1.10.F).

1.2. Indian Economy Overview

Real GDP is projected to grow by 6.3% during the 2026-27 fiscal year (FY) and by 6.4% in FY2027-28. Rising inflation is expected to weigh on private consumption, while investment slows amid higher oil and gas prices and gas rationing. Employment growth and labour market participation are set to weaken. Inflation is projected to increase to 4.8% in FY2026-27, driven by higher food, energy and fertiliser costs, and currency depreciation. The current account deficit is expected to widen, as higher energy import costs outweigh the impact of weaker domestic demand. More persistent energy rationing could lead to weaker growth. On the upside, energy support could cushion real incomes and consumption more than expected.

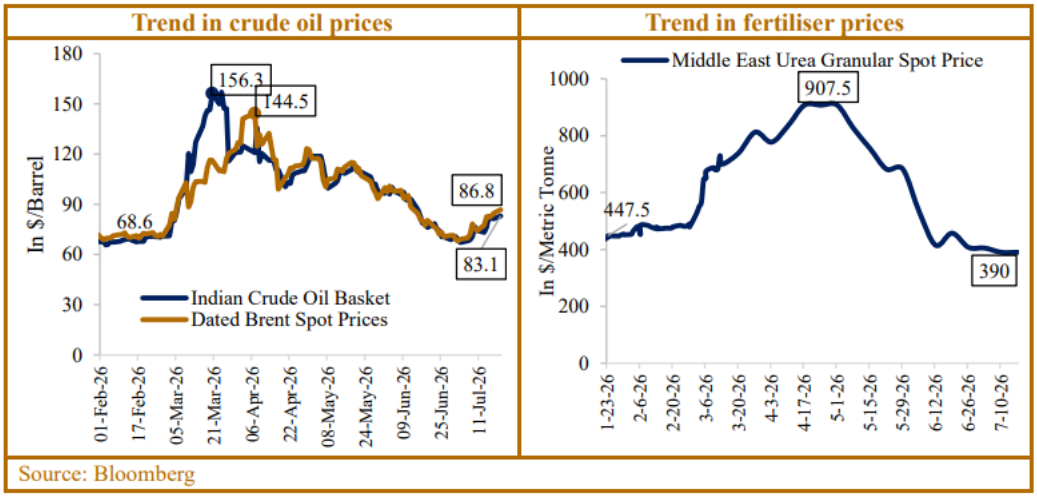

Fiscal policy is poised to turn expansionary in FY2026-27 to mitigate the impact of higher energy prices, notably through subsidies. Moving from price support to targeted transfers could reduce the fiscal cost of policy support. Following a period of easing, monetary policy is projected to tighten with a policy rate increase in early FY2026-27 to help keep inflation within the target band. Streamlining and harmonising regulations would reduce administrative burdens, boosting productivity and investment. Accelerating the rollout of renewable energy sources would strengthen energy security and reduce carbon emissions.

The IMF's July 2026 World Economic Outlook (WEO) Update projects global growth to moderate from 3.2 per cent in 2025 to 3.0 per cent in 2026, before recovering to 3.4 per cent in 2027. The slowdown reflects the effects of the war in the Middle East, which are being partly offset by momentum in the global technology cycle, driven by advances in artificial intelligence and its adoption. As a result, growth prospects vary across economies, with those better integrated into the technology value chain or benefiting from favourable terms of trade expected to fare better than energy-importing economies with limited participation in the technology cycle. Meanwhile, higher commodity prices are expected to interrupt the global disinflation process. Accordingly, the IMF projected global headline inflation to rise from 4.1 per cent in 2025 to 4.7 per cent in 2026, before easing to 3.9 per cent in 2027.

INFLATION

CPI inflation

As per the new 2024 base series, CPI inflation remained benign at 3.2% in February 2026, though it edged up from 2.7% in January 2026 (Chart 3). Notably, headline CPI inflation had remained below the RBI's 4% target since January 2025, reflecting improved supply conditions, lower global crude prices, and subdued core price pressures. The marginal uptick in headline inflation was primarily driven by food inflation, which increased to 3.4% in February 2026 from 2.1% in the previous month. Within food items, inflation in vegetables, pulses and allied products turned positive at 0.13% in February 2026, reversing the deflation of (-)5.13% recorded in January 2026, largely due to seasonal supply moderation and a partial normalization of prices after sharp declines in the preceding month. Personal care, social protection and miscellaneous services continued to experience the highest inflation among all sub-groups, rising to 19.7% in February 2026 from 19.1% in January 2026. Inflation in precious metals and jewelry remained elevated, with gold/diamond/platinum jewelry and silver jewelry recording inflation levels of 48.2% and 160.8%, respectively, primarily driven by elevated global bullion prices and strong investment-driven demand. During the first two months of 2026, inflation moderated across certain discretionary and essential categories, including (a) clothing and footwear (2.8% from 3.0%), (b) health (1.9% from 2.2%), and (c) restaurants and accommodation services (2.7% from 2.9%). Inflation in transport services and equipment and information and communication services and equipment remained subdued at (-)0.05% and 0.2%, respectively, in February 2026, broadly unchanged from their January 2026 levels. The continued price stability in transport services reflects restrained fuel pass-through whereas that in communication services and equipment reflects technological cost efficiencies and competitive market conditions.

WPI inflation

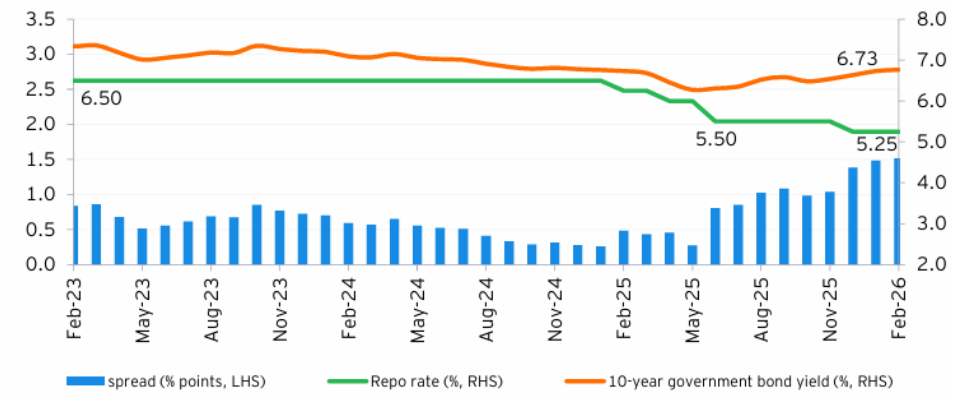

Headline WPI inflation remained benign, though reflecting a marginal uptick to 2.1% in February 2026 from 1.8% in January 2026 (Chart 3). The increase largely reflected higher inflation in fruits and oilseeds, alongside a moderation in the pace of contraction in prices of crude petroleum and pulses. The pace of contraction in price of pulses eased to (-)5.9% in February 2026 from (-)11.1% in January 2026, indicating a partial normalization of supply conditions. Fruit inflation increased to 3.6% from 1.8% over the same period, likely driven by seasonal factors and weather-related supply pressures. Oilseeds inflation rose sharply to 25.4% in February 2026 from 19.2% in the previous month, reflecting tight domestic availability and firm global prices. Vegetable inflation moderated to 4.7% in February 2026 from 6.8% in January 2026, mainly on account of a decline in inflation in tomatoes, following improved market arrivals. WPI food index–based inflation increased marginally to 1.8% in February 2026 from 1.4% in January 2026, mirroring mixed price movements across food sub-components. The pace of contraction in wholesale crude petroleum prices moderated significantly to (-)1.3% in February 2026 from (-)11.2% in January 2026, reflecting firmer global crude prices. This trend, however, is likely to reverse in March 2026, given the sharp spike in global crude prices triggered by escalating geopolitical uncertainties. Fuel and power inflation remained in non-positive territory for the 19th consecutive month, although the pace of contraction eased slightly to (-)3.8% in February 2026 from (-)4.0% in January 2026. The contraction in electricity prices also moderated to (-)3.0% from (-)3.6%, suggesting some pass-through from higher input costs. Inflation in manufactured products remained stable at 2.9% in February 2026, unchanged from January 2026. Within this category, however, inflation in manufactured basic metals eased to 4.4% from 6.0%, reflecting softer global metal prices and subdued domestic demand. Core WPI inflation remained broadly stable at a low level, inching

up marginally to 3.3% in February 2026 from 3.2% in January 2026, indicating continued cost pressures but no significant broad-based acceleration.

MONETARY SECTOR

The Monetary Policy Committee (MPC) retained the repo rate at 5.25% (Chart 12) in its February 2026 monetary policy review while also maintaining a neutral policy stance. In RBI's assessment, the near-term inflation outlook remained benign largely owing to favorable food supply conditions supported by healthy kharif output, comfortable buffer stock of foodgrains and positive rabi sowing prospects. It assessed that core inflation is expected to be range bound, although it may temporarily experience volatility owing to movements in prices of precious metals. The RBI expects upside risks to inflation to emanate from heightened geopolitical uncertainty, volatility in global energy prices and adverse weather events.

AGGREGATE CREDIT AND DEPOSITS

Growth in gross bank credit10 remained strong at 14.6% in January 2026, close to its level of 14.5% in December 2025 (Chart 13). Non-food credit growth remained stable for the second successive month at 14.4% in January 2026 driven by higher growth rates in personal loans and credit to services sector. Among the key segments of non-food credit, growth in credit to services sector, with an average share of about 27% in total non-food credit (last five years), was 15.5% in January 2026, close to its growth of 15.3% in December 2025. Personal loans (share close to 30% in total non-food credit) also showed a healthy growth of 14.9% in January 2026, increasing from 14.4% in December 2025. Among its sub-components, growth in vehicle loans increased to 17.1% in January 2026 from 16.5% in December 2025. Housing loans posted a stable growth of 11.1% in January 2026, similar to its level in December 2025. Loans for consumer durables, however, contracted for the third successive month by (-)4.0% in January 2026, as compared to (-)5.1% in December 2025. Outstanding credit to industries, having a share of about 25% on average in total non-food credit (last five years) posted a strong growth of 12.1% in January 2026 although remaining lower as compared to 13.3% in December 2025. Among major segments within industrial credit, growth in credit to infrastructure, having the largest share in industrial credit, was lower at 6.4% in January 2026 as compared to 7.2% in December 2025. Growth in credit to iron and steel and textiles also moderated to 8.2% and 10.0% respectively in January 2026 as compared to 9.5% and 11.8% in December 2025. Growth in credit to agricultural sector remained strong at 11.4% in January 2026, although moderating from 12.1% in December 2025. Growth in other non-food credit, i.e., non-food credit excluding credit to agriculture, industry, services and personal loans, was at 24.2% in January 2026, higher as compared to 20.8% in December 2025. Growth in aggregate deposits was lower at 12.5% in January 2026 compared to 12.7% in December 2025.

FINANCIAL SECTOR

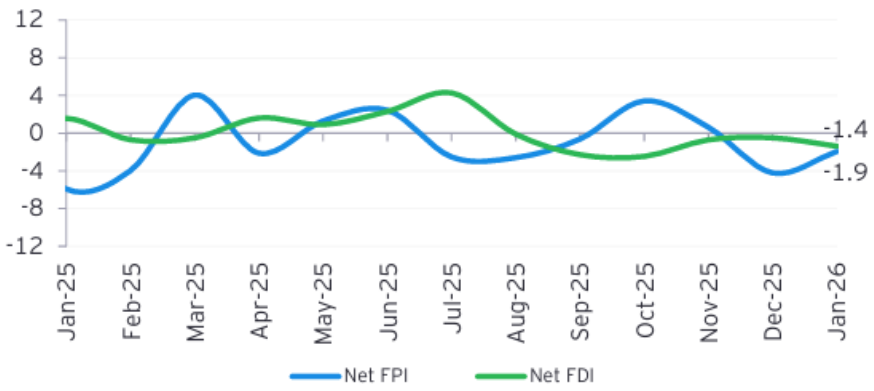

Interest Rates

As per the data released by the RBI in the second week of March 2026, the yield on 10-year government bonds (benchmark) increased for the fourth successive month to reach 6.77% in February 2026 from 6.73% in January 2026 (Chart 16). Benchmark bond yields have thus increased by a total of 28 basis points from a local trough seen in October 2025. The average interest rate on term deposits with a maturity period of more than one year at 6.26% in February 2026 was close to its level of 6.25% in January 2026, with actual rates ranging between 6.00% and 6.53%. The average MCLR was retained at 7.83% in January and February 2026, with the actual MCLR ranging between 7.70% and 7.95% during the month. WALR on 'Fresh Rupee Loans' (FRL) by SCBs increased by 39 basis points to 8.67% in January 2026 from 8.28% in December 2025.

FDI and FPI

Net FPIs witnessed outflows for the second successive month in January 2026 at US$1.9 billion following outflows of US$4.2 billion in December 2025 (Chart 14). During April-January FY26, on a cumulated basis, net FPI outflows amounted to US$6.2 billion compared to net inflows amounting to US$3.5 billion during the corresponding period of FY25. Net FDIs remained negative for the sixth successive month with higher outflows of US$1.4 billion in January 2026 as compared to US$0.5 billion (revised) in December 2025. Gross FDI inflows at US$5.7 billion in January 2026 was lower as compared to US$8.5 billion in December 2025. Despite positive gross FDI inflows, net FDIs witnessed outflows due to sustained repatriation/disinvestment and FDI by India. Repatriation/disinvestment was lower at US$4.9 billion in January 2026 as compared to US$6.0 billion in December 2025, while FDI by India at US$2.1 billion in January 2026 was also lower as compared to US$3.0 billion in December 2025. On a cumulated basis, during April-January FY26, net FDI inflows were lower at US$1.7 billion compared to US$2.2 billion during the corresponding period of FY25. Gross FDI inflows during April December FY26 at US$79.3 billion were higher compared to US$69.2 billion during the corresponding period of FY25.

The global economy continues to face heightened uncertainty amid geopolitical tensions and evolving trade and financial conditions, with risks to the outlook remaining tilted to the downside. Against this backdrop, India's macroeconomic fundamentals and domestic demand are expected to continue supporting economic activity. RBI has forecast 6.6% growth for FY27, with downside risks. While global crude price fluctuations from geopolitical events and potential El Niño weather patterns are being carefully monitored, the domestic inflation outlook remains cautious and structurally well-supported, anchored by active measures to support price stability, robust agricultural commodity procurement and targeted contingency plans in place. Internationally, the IMF projects global headline inflation at a manageable 4.7 per cent for 2026 while the RBI's Monetary Policy Committee maintains an unchanged policy repo rate of 5.25 per cent with a neutral stance, forecasting FY27 CPI inflation at a manageable 5.1 per cent.

The revised Index of Core Industries (Base Year: 2022–23) recorded a robust 5.0 per cent year-on-year growth in June 2026, while the revised IIP indicates that manufacturing activity remained resilient in May 2026, supported by sustained capital goods-led investment despite some moderation from the high growth recorded earlier in the year. Going forward, continued implementation of strategic initiatives across semiconductors through Semicon 2.0, critical minerals, coal gasification and shipbuilding, together with recent measures to streamline regulatory compliance and facilitate manufacturing, is expected to strengthen domestic manufacturing capabilities, enhance supply-chain resilience and improve the competitiveness of India's industrial sector. Progress in emerging sectors such as commercial space and hydrogen-based mobility further reflects the broadening of India's industrial and technological capabilities in support of long-term sustainable growth. At the same time, the sustained firmness in prices of industrial metals, rare earths and other critical minerals is a reminder that resilience-building activities should not be merely a response to real and ongoing vulnerabilities. Building adequate buffers across energy and industrial metals will likely remain important to India's industrial and macroeconomic stability going forward. Even as geopolitical frictions persist and impact trade and cross-border capital flows, India's external sector exhibits notable resilience. Strong export performance, a services trade surplus, and consistent remittance flows have strengthened the current account. Furthermore, recent policy measures will provide an impetus to capital inflows in the near term. Together with adequate foreign exchange reserves, these factors are expected to reinforce the external sector's resilience.

TRENDS

Union Minister of Textiles, Mr. Giriraj Singh, expressed confidence that India's technical textile industry will surpass the US$ 10 billion target set for 2030. Textile manufacturing in India has shown varied performance in 2025. The Manufacturing of Textiles Index stood at 107.1, registering a growth of 0.4% compared to February 2025, indicating stable performance in textile manufacturing. The textile sector contributes significantly to employment, generating 11% of the manufacturing sector's jobs. In February 2026, the Government of India has finalized seven PM MITRA Parks with a total outlay of Rs. 4,445 crore (US$ 502.97million) for implementation up to2027–28, aimed at strengthening integrated, large scale textile manufacturing infrastructure and enhancing global competitiveness. The Virudhunagar (Tamil Nadu) park has achieved 100% land acquisition, with a DPR of Rs. 1,894 crore (US$ 214.31million) approved, and infrastructure works worth Rs. 364 crore (US$ 41.19 million) awarded, positioning it as a key hub for technical textiles and value added processing. In April 2025, Madhya Pradesh has secured approval for the Rs. 2,100 crore (US$ 239.59 million) PM MITRA Park, a project poised to revolutionize the state's textile industry. This integrated park, spanning 2,100 acres, will feature advanced facilities and residential complexes, attracting significant investment and creating numerous jobs. The sector employs over 45 million people and produces approximately 22,000 million pieces of garments annually. While the government is working towards upliftment of technical and MMF textile companies by upscaling its infrastructure, it is also interesting to note that textile will be added to the educational curriculum in the near future.

Textile Parks

In February 2026, PM MITRA Park in Virudhunagar, Tamil Nadu has allotted 190.44 acres of industrial land to 23 investors, unlocking investments worth Rs. 2,192 crore (US$ 248.03 million) with a potential to generate around 15,000 jobs, indicating strong industry participation and progress in building an integrated textile value chain. In February 2026, Madhya Pradesh has emerged as a leading PM MITRA hub, attracting investment commitments of over Rs. 21,500 crore (US$ 2432.81 million) and significant land allotments, reinforcing the role of mega textile parks in driving large-scale investments and employment generation. In February 2026, Infrastructure development across PM MITRA Parks has gained momentum, with works worth over Rs. 2,160 crore (US$ 244.41 million) initiated by state governments and Rs. 564.72 crore (US$ 63.90 million) already spent, strengthening connectivity and logistics for large-scale textile manufacturing clusters.

Incubation in apparel manufacturing

The objective here has been to promote entrepreneurs in apparel manufacturing by providing them an integrated workspace and reducing operational and financial cost for establishing and growing a new business.

Technical textiles

The central government has set a target to export Rs. 87,450 crore (US$ 10 billion) worth of technical textiles under its National Technical Textiles Mission. Secretary of the Ministry of Textiles, Ms. Rachna Shah, announced that India's technical textiles market has great potential, with a notable growth rate of 10% and ranking as the 5th largest in the world. The technical textiles market for automotive textiles is projected to increase to US$ 3.7 billion by 2027, from US$ 2.4 billion in 2020. Similarly, the industrial textiles market is likely to increase at an 8% CAGR from US$ 2 billion in 2020 to US$ 3.3 billion in 2027. The India mobiltech textile market (a division of technical textiles for automotive use) is projected to grow from US$ 2.32 billion in FY25 to US$ 4.57 billion by FY33, at a CAGR of 8.84%. This growth is driven by rising demand for advanced materials, electric vehicles, and sustainability focus.

Public Private Partnership (PPP)

The Ministry of Textiles commenced an initiative to establish institutes under PPP to encourage private sector participation in the development of the industry. In January 2026, PM MITRA Parks are being developed under a Public-Private Partnership (PPP) model, with DPRs worth Rs. 5,567 crore (US$ 629.93 million) finalized for greenfield parks in Uttar Pradesh, Karnataka and Gujarat, reflecting increasing private sector participation in developing integrated textile manufacturing infrastructure.

Promotion of khadi

In February 2026, The Khadi and Village Industries Commission (KVIC) continued to strengthen the Khadi sector through market linkage, brand promotion and e-commerce integration, with support extended through schemes such as MMDA, ISEC, workshed assistance and marketing support for sales outlets. The Khadi and Village Industries Commission (KVIC) recorded a historic turnover of Rs. 1.70 lakh crore (US$ 19.23 billion) in FY25, reflecting the continued revival of Khadi and village industries, alongside stronger demand, employment generation, and broader rural economic activity.

R&D

In January 2026, the Ministry of Textiles signed MoUs with 15 states under the Tex-RAMPS scheme to strengthen data systems, research planning and evidence-based policymaking in the textile sector, reinforcing collaborative R&D and innovation-led growth across states. On February 2026, Under the GREAT scheme of the National Technical Textiles Mission (NTTM), 24 start-ups have been approved, with support of up to Rs. 50 lakh (US$ 0.06 million) per start-up. In addition, the NTTM has approved 168 R&D projects in speciality fibres and applications with an outlay of around Rs. 520 crore (US$ 58.84 million), and the mission has been extended until March 31, 2026, strengthening innovation and research capabilities in the textile sector.

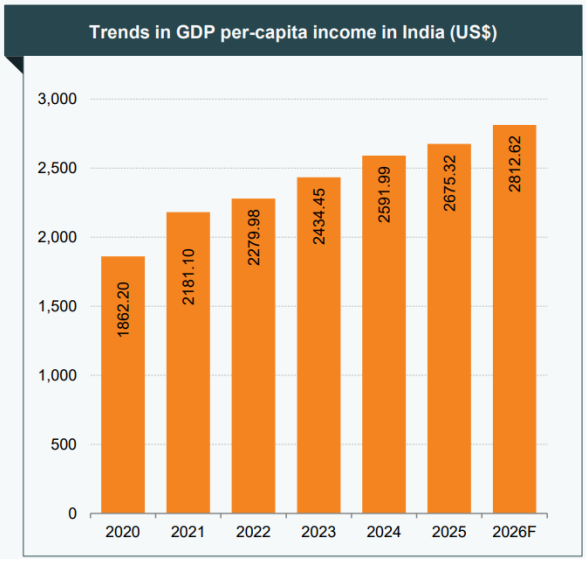

Scaling-up organic cotton industry

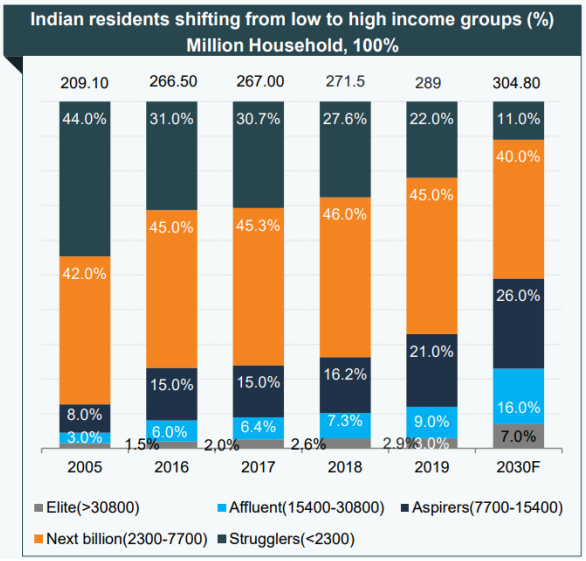

The Government has stepped up efforts to scale up organic and naturally coloured cotton production through a pilot project across eight clusters and four fashion houses, along with collaborative initiatives with ICAR-CICR and NITRA to develop organic production practices, release naturally coloured cotton seed varieties and augment supply of bio-fibres. The move is supported by cluster-based organic cultivation programmes such as PKVY and MOVCDNER, which also cover production, processing, certification and marketing support. Cott-Ally mobile app has been developed for farmers to increase awareness about MSP rates, nearest procurement centers, payment tracking, best farm practices etc.

Innovations to create sustainable textiles

On February 2026, the Government is promoting sustainable and circular textile innovation through initiatives under the National Technical Textiles Mission and industry collaborations focused on recycling, upcycling and use of eco-friendly fibres. Research and innovation efforts are being supported through approved R&D projects in speciality fibres and applications, along with start-up support under the GREAT scheme to accelerate development of sustainable textile solutions. Arvind Limited, the largest textile to technology conglomerate in India, and PurFi Global LLC, a sustainable technology firm that specialises in rejuvenating textile waste into virgin grade products, have formed a joint venture to reduce the quantity of textile waste dumped in landfills. The Sustainable Textiles for Sustainable Development (SusTex)

project by the United Nations Climate Change entity enhances the employment and working circumstances of textile artisans while promoting the sustainable production and use of environmentally friendly textiles. Sangam India Ltd, one of the foremost producers in PV dyed yarn, cotton and OE yarn and also ready to stitch fabric, has installed two solar power plants of 5 MW that on average helps them to bring down their carbon footprint by at least 20% per annum. SIL also plans to increase the use of recycled fibre, leading to lesser consumption of plastic waste by using it as a raw material.

EXPORT

According to ICRA, Indian apparel exporters are expected to see revenue grow by 9-11% in FY26. This will be driven by higher sales volumes and prices, supported by the "China Plus One" strategy and importers needing to restock inventory. India is the world's second-largest textile exporter. Capacity built over years has led to low cost of production per unit in India's textile industry. This has lent a strong competitive advantage to the country's textile exporters over key global peers. During FY26 (April-June 2025) the total exports of textiles and apparels (incl. handicrafts) stood at stood at US$ 9.40 billion, with RMG (45%), Cotton Textiles (30%), and Man-Made Textiles (12%) as key contributors. The Indian composites market is expected to reach an estimated value of US$ 1.9 billion by 2026 with a CAGR of 16.3% from 2021 to 2026 and the Indian consumption of composite materials will touch 7,68,200 tonnes in 2027. In January 2026, India's textile and apparel exports declined by 3.75% YoY to US$ 3.27 billion in January 2026, reflecting continued pressure from global demand slowdown and tariff-related challenges, even as man-made fibre-based exports showed resilience with marginal growth.

BUSINESS OVERVIEW

Our Company was incorporated in March 2024. Prior to its incorporation, our Promoters, Mr. Sanjay Gupta and Mr. Sooraj Gupta, were engaged in the textile business through their respective proprietorship concerns. Mr. Sanjay Gupta was operating in the textile business under the name M/s SR Fabrics since 1994, while Mr. Sooraj Gupta was managing business activities through M/s SG Trader since 2017 and M/s Neelmadhav Textiles since 2023, primarily engaged in manufacturing through third-party arrangements and bulk distribution of denim fabrics.

Our Company was subsequently incorporated and the Promoters, Mr. Sanjay Gupta and Mr. Sooraj Gupta, were appointed as Directors of the Company, with the objective of taking over the ongoing operations of the aforementioned proprietorship concerns and continuing their denim fabrics business under a single unified entity with formal recognition. Thereafter, the business transfer from the proprietorships to our Company was agreed, confirmed, and made effective from March 31, 2024, through the execution of three separate Business Transfer Agreements dated April 6, 2024 ("**BTAs**") with each of the aforesaid proprietorship concerns. Pursuant to the execution of the BTAs, our Company acquired all assets and liabilities relating to the respective businesses as on the effective date of the BTAs. Ms. Sanyogita Gupta was subsequently inducted on the Board of Directors of the Company as a Non-Executive Director with effect from July 20, 2024 and was thereafter categorised as a Promoter Director with effect from March 06, 2026, in accordance with applicable laws and corporate approvals.

We are engaged in the manufacturing of denim fabrics through arrangements with third-party manufacturers and also using our leased loom machineries. In addition to our manufacturing activities, we also procure finished denim fabric from various distributors and suppliers. We sell our finished denim fabric in bulk to garment manufacturers, distributors, dealers and wholesalers, across multiple states in India.

In line with the objective of business expansion and value chain integration, our Company recently established a limited self-manufacturing set-up through taking on lease loom machineries for a duration of three years (commencing from March 01, 2025 and valid till February 28, 2028) for which commercial operations have commenced from July, 2025. This strategic step enables us to partially carry out self-production of denim fabrics while maintaining partnerships with the external manufacturers.

Our product offering comprises finished denim fabric only, which is distributed across key markets in Delhi, Uttar Pradesh, Gujarat and Rajasthan. We manufacture denim fabrics under our own brand name 'NJD' through manufacturing arrangements with third-parties and also using our leased loom machineries. In respect of our manufacturing arrangements with third-parties, we have partnered with manufacturing facilities located at Narol and Piplaj in Ahmedabad, which are capable of producing finished denim fabrics directly from cotton yarn using raw materials supplied by our Company.

Our partnered manufacturers, with whom we are currently engaged with for the production process, follow standard industry norms in the fabrics manufacturing process. Such manufacturers also enable us to oversee the process of manufacturing process as per our requirement, without their intervention. We further inspect the fabric prior to dispatch to ensure that the fabrics are manufactured in accordance with our requirements.

Our manufacturing operations involve two primary processes, depending on whether the Company procures cotton yarn or greige fabric as the base input. In cases where manufacturing is undertaken from cotton yarn, the process commences with procurement of raw materials, specifically cotton yarn, which is a fundamental material of our fabrics. Next step on such manufacturing is yarn warping wherein the yarn is arranged in parallel and evenly spaced on warp beams, preparing it for the subsequent weaving process. After yarn dyeing, the dyed yarn is then woven into fabric using air jet looms. Following weaving, the fabric undergoes a series of finishing treatments. These treatments may involve processes such as singeing, wet finishing, foam finishing, over-dyeing, bleach washing, etc., aimed at achieving the desired appearance and ensuring it meets the desired hand feel. Once the finishing process is completed, the fabric is inspected to ensure that the quality and standards of manufactured fabrics are as per the desired requirements and subsequently they are rolled onto fabric rolls and are ready for sale and distribution.

Alternatively, where the Company procures greige fabric, the manufacturing process involves processing such greige fabric into finished fabric. In this process, the greige fabric is first inspected and then subjected to dyeing, printing and/or finishing treatments, as applicable. These processes may include wet processing, bleaching, dyeing, washing and finishing operations to impart the desired colour, texture, performance characteristics and appearance. Following processing, the finished fabric undergoes quality inspection and is then packed in fabric rolls for sale and distribution.

These fabrics are also supplied in roll form and customized in terms of texture, finish, and design. Shirting fabric is primarily used for formal and casual shirts and caters to garment manufacturers, wholesalers, and fabric retailers in the men's and unisex segments.

While the machineries of our external manufacturing partners as well as our leased looms have the capability to produce and supply unstitched shirting and suiting fabrics, our sales to date have been limited to denim fabric. This is primarily driven by the nature of orders received from our customers and prevailing market demand, which has been focused on denim. Accordingly, all revenue generated so far pertains exclusively to denim fabric.

OUR BUSINESS PROCESS

The flow chart below describes our business process:

1. Manufacturing Process

A. Manufacturing through Yarn

(i) **Procurement of Yarn:** The production process begins with the procurement of cotton yarn, which forms the foundational raw material for greige fabric manufacturing. Yarn is sourced from suppliers based on parameters set by the end-clients, such as count specifications, fibre strength, and consistency. The procurement team ensures that the yarn meets the required quality standards. The procured yarn is dispatched by suppliers to our external dyeing units for job work.

(ii) **Dyeing of Yarn:** Yarn dyeing is a specialized process where yarns are dyed before being woven or knitted into fabric. This stage involves treating the fabric with chemicals and dye solutions to achieve its final finished form. The dyeing process is carried out as per technical specifications provided by us on the **basis** of the end-use requirements, ensuring appropriate coloration suited for subsequent weaving processes. Upon completion of the dyeing process, a preliminary inspection is conducted to assess dye uniformity, shade accuracy, and yarn quality as per requirement. Any discrepancies are addressed with the dyeing partners for rectification. Accepted dyed yarn is then tagged and stored systematically for the weaving stage.

(iii) **Weaving of Dyed Yarn to Greige Fabric:** Yarn weaving is a fundamental process in textile manufacturing, wherein yarns are interlaced to produce fabric. The weaving is carried out using air jet looms, which utilize compressed air technology to enable speed and precision and are suitable for large-scale fabric production. For each order, peg plans are prepared by our team based on client requirements, including the type of fabric (denim, shirting or suiting), colour scheme, and technical specifications such as weft count, warp count, shade, ends per inch (EPI), picks per inch (PPI), reed space, and other parameters, and fed into the looms.

(iv) The dyed yarn is dispatched for weaving either to our external manufacturing partners or to our leased loom premises, where it is woven into greige fabric in accordance with the approved peg plans. In the case of leased looms, the machines are managed by the lessor's workforce under our supervision, allowing us to maintain an asset-light model while controlling output quality. The weaving output is continuously monitored by the external partner or lessor's workforce (as the case may be) as well as our dedicated supervisor to ensure consistency in texture and weaving patterns as per the prescribed requirement.

(v) **Quality Check of Greige Fabric:** Post weaving, the greige fabric undergoes inspection either at the premises of the leased loom machines or the external manufacturing partners (as the case may be) to ensure adherence to quality benchmarks as per end-use requirements. Only fabrics meeting the required standards are approved for further processing. The inspection process for denim fabrics involves a series of tests and evaluations to ensure the quality and adherence to standards. It includes:

(a) Visual Inspection: to examine fabrics in controlled lighting as well as inspect for detects such as oil strains, holes, dying, printing marks, etc.

(b) Physical Inspection: includes sample-based assessments of fabric strength and durability, colour resistance to determine the extent of fading or colour transfer when exposed to various conditions, and abrasion resistance to ensure the fabric's durability against wear and tear.

(vi) **Finishing of Greige Fabric:** Once approved, the greige fabric is dispatched to external partners for finishing process. The finishing process in fabrics is a crucial stage where fabrics undergo various treatments to enhance their overall quality. It includes processes such as scouring to remove impurities, bleaching to achieve desired whiteness or brightness, dyeing, softening, singeing, desizing, calendaring, etc. These treatments are carefully applied to ensure fabrics meet desired end-use requirements. This step enhances the fabric's appearance, texture, and overall usability. The responsibility for transportation of the greige fabric to the finishing facility lies with the external finishing partner.

(vii) **Packing and Dispatch:** After finishing and inspection, the final fabrics are rolled onto fabric rolls and stored in the **external** partner's godown. The rolled fabrics are dispatched to the client's location upon our confirmation, while the remaining rolls are retained in the godown until further confirmation for dispatch.

B. Manufacturing through Greige Fabric

(c) **Procurement of Greige Fabric:** The production process begins with the procurement of greige (unfinished) fabric, which serves as the base material for manufacturing finished denim fabric. Greige fabric is sourced from third-party suppliers based on parameters specified by end-clients, such as fabric construction, composition, width, GSM, and end-use requirements. The procurement team ensures that the greige fabric meets the prescribed quality standards. The procured greige fabric is dispatched by suppliers to our external processing partners for further treatment.

(d) **Processing and Dyeing of Greige Fabric:** Processing and dyeing of greige fabric is a specialised stage wherein the fabric undergoes wet processing treatments to achieve the desired colour, finish and performance characteristics. This stage may include processes such as scouring, bleaching, dyeing and washing, carried out as per technical specifications provided by us based on end-use requirements. Upon completion, a preliminary inspection is conducted to assess shade accuracy, colour uniformity and fabric quality. Any deviations are addressed with the processing partners for rectification. Approved fabric is then tagged and prepared for the next stage.

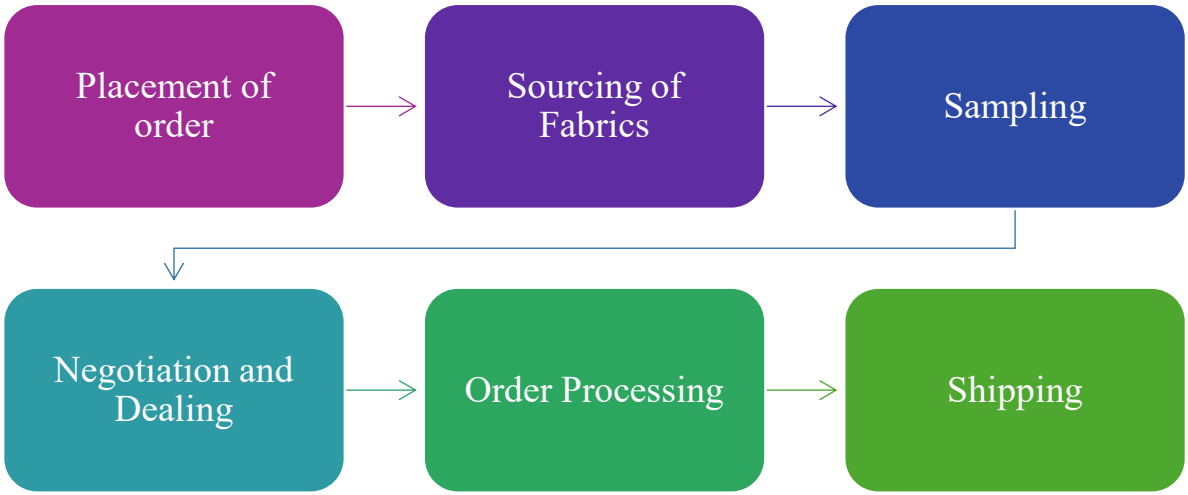

(i) **Quality Check of Processed Fabric:** Post processing, the fabric undergoes inspection at the facilities of the external processing partners to ensure adherence to prescribed quality benchmarks. The inspection process includes visual examination under controlled lighting to identify defects such as stains, shade variations or surface irregularities, as well as sample-based physical assessments relating to colour fastness and fabric durability. Only fabrics meeting the required standards are approved for further finishing.

(ii) **Finishing of Processed Fabric:** Once approved, the processed fabric is dispatched to external finishing partners for finishing treatments. The finishing process may include operations such as softening, singeing, desizing, calendaring or other treatments depending on end-use requirements. These processes enhance the fabric's appearance, texture and usability and ensure conformity with required specifications. The responsibility for transportation of the fabric to the finishing facility lies with the external finishing partner.

(iii) **Packing and Dispatch:** After finishing and final inspection, the finished fabric is rolled onto fabric rolls and stored at the external partner's godown. The finished fabric rolls are dispatched to customers upon our confirmation, while balance quantities are retained at the godown until further instructions for dispatch.

The typical lifecycle for production and dispatch of finished denim fabrics is around 30 to 45 days. While customers place bulk orders with us, the finished fabric rolls are dispatched to the customers in tranches to manage logistics and to avoid extended storage at the godown.

2. Bulk Sale & Distribution Process

(i) Placement of order: We generate purchase orders for denim fabric based on the demand generated through our sales and marketing team. In addition to this, we also get orders from our previous clients based on their requirements.

(ii) Sourcing of Fabrics: We **source** our fabrics through the following means:

(a) Manufactured in accordance with the process set out under the section "***Manufacturing Process***" above in this chapter "***Our Business***" on page no. 132 of this Prospectus; or
(b) Sourced from denim fabric distributors, which involves identifying potential suppliers, evaluation of quality and quantity, pricing, delivery schedule, etc.

(iii) Sampling: This process involves providing samples to our potential dealers of the available denim fabric, using hangers that feature our brand "NJD''. The samples are presented to dealers through personalized meetings, showroom displays, etc. This interaction allows dealers to examine the fabric closely, feel its texture, and evaluate its suitability, helping them make informed decisions.

(iv) **Negotiation and Dealing:** This process involves negotiation with our potential customers on various aspects including but not limited to pricing, quantities, delivery schedules, and any specific customization requirements that dealers may have.

(v) **Order Processing:** After finalization of discussion, we move on to the order processing phase. This step involves reviewing the details of the agreed-upon third-party or purchase order, ensuring accuracy in terms of product specifications, quantities, pricing, and delivery schedules. Our team then coordinates internally to initiate the necessary steps for shipping of the products.

(vi) **Shipping:** After processing the order, we prepare for shipping of the products, which involves coordinating closely with our logistics partners to ensure prompt and secure delivery of the denim fabrics to the dealers. Logistics are arranged by the customers, who bear the associated risk of transportation.

Textiles Committee Act, 1963

The Textiles Committee Act, 1963 came into force on August 22, 1964. The Textiles Committee has been established under the Textiles Committee Act, 1963 with the primary objective of ensuring standard quality of textiles for both domestic and export markets, as well as standardization of the type of textile machinery used for production. The Textiles Committee's functions include, among others, the promotion of Indian textiles and textile exports, researching in technical and economic fields, establishing standards for Indian textiles and textile machinery, setting up of laboratories and data collection. Additionally, the Textiles Committee regulates the imposition of cess on textiles and textile machineries manufactured in India.

National Textile Policy, 2000

The National Textile Policy, 2000 was introduced to promote the growth and modernization of India's textile industry and position it as a leading global player in manufacturing and exports. It aims to liberalize regulations, enhance competitiveness, and support technological upgrades, productivity, quality, product diversification, and employment generation. The policy also addresses the specific needs of key segments such as raw materials, spinning, weaving, powerlooms, handlooms, and jute, while outlining implementation mechanisms to ensure effective execution and help the industry achieve global excellence.

The salient objectives of the National Textile Policy, 2000 are as follows:

- Strengthen the Indian textile industry to withstand the challenges of import penetration and retain a dominant position in the domestic market.
- Develop a robust and diversified multi-fibre base, with emphasis on product upgradation and innovation.
- Preserve and promote the traditional knowledge, skills, and craftsmanship of weavers and artisans.
- Enhance human resource development, particularly in the decentralized and unorganized sectors, through revitalization of institutional support systems.
- Integrate IT across the entire textile value chain to improve efficiency and competitiveness.
- Promote quality, design, and marketing to enable Indian textiles to meet international standards.
- Foster active collaboration among State Governments, financial institutions, industry stakeholders, farmers, and NGOs to create a supportive and sustainable environment for the growth of the sector.

Through this policy, the Government reaffirms its commitment to creating an enabling framework that allows the Indian textile industry to reach its full potential, achieve global competitiveness, and contribute meaningfully to socio-economic development.

Textile Development and Regulation Order, 2001 ("Textile Order")

Under the powers conferred by Section 3 of the Essential Commodities Act, 1955, and to supersede the Textile (Development and Regulation) Order, 1993, the Central Government implemented the Textile Order. The ***Textile*** Order mandates that every

manufacturer of textiles, textile machinery, and any individual involved in the textile trade must maintain books of accounts, data, and records pertaining to various aspects of their business. This *inter alia* includes production, processing, import, export, supply, distribution, sale, and consumption of textiles. Additionally, they are also required to submit returns or information as requested by the Textile Commissioner. The Textile Order empowers the Textile Commissioner by notification to issue directives, with the prior approval of the Central Government, regarding several key aspects of textile manufacturing and trade. These directives can include:

- **Specifications and Classes:** Restrictions on the types or classes of textiles that can be manufactured.
- **Dyes and Chemicals**: Prohibitions on specific dyes and chemicals used in textile production.
- **Quantities:** Limits on the maximum and minimum quantities of textiles that can be manufactured.
- **Pricing:** Controls on the maximum ex-factory, wholesale, or retail prices at which textiles can be sold.
- **Markings:** Requirements for manufacturers regarding the markings on textiles, including the specifics of how and when these markings should be made.
- **Testing:** Orders for laboratory tests related to textiles as specified by the Textile Commissioner.

In addition to the above, the Textile Commissioner also has the authority to direct laboratory officers to conduct tests as specified, ensuring compliance with the regulations established under the Textile Order.

Cotton Control Order, 1986

The Cotton Control Order, 1986 (under Section 3 of the Essential Commodities Act, 1955) empowers the Textile Commissioner to regulate cotton stock-holding limits for manufacturers, ginning factories, pressing factories, combined ginning & pressing units, and non-farmer individuals or entities. It mandates specific quality standards for packing of cotton, with additional specifications on bale dimensions, moisture, and trash content for domestic trade. Moreover, the Cotton Control Order, 1986 enables the Textile Commissioner to inspect premises, seize stock, collect periodic data, and monitor compliance.

The Bureau of Indian Standards Act, 2016

Bureau of Indian Standards Act, 2016 provides for the establishment of the Bureau of Indian Standards ("**BIS**") for the development of the activities, *inter alia*, standardisation, conformity assessment and quality assurance of goods, articles, processes, systems and services, and for matters connected therewith and incidental thereto. Under the Bureau of Indian Standards Rules, 2018, BIS is required to establish Indian standards in relation to any goods, article, process, system or service and shall reaffirm, amend, revise or withdraw Indian standards so established as may be necessary.

Bureau of Indian Standards (Conformity Assessment) Regulations, 2018 ("BIS Regulations")

The BIS Regulations provide a framework for certifying goods, services, systems, and processes to ensure they meet Indian Standards. The BIS Regulations empower BIS to carry out inspections, testing, and grant licenses or certifications to promote quality, safety, and consumer protection. The conformity assessment is structured under various schemes listed in the schedules of the BIS Regulations.

Schedule II, Scheme II of the BIS Regulations specifically covers the Certification of Conformity for products and services not under mandatory certification. It enables both Indian and foreign manufacturers to voluntarily apply for BIS certification and use the Standard Mark, provided their products meet the applicable Indian Standards. The scheme involves product testing, inspection of manufacturing facilities, and evaluation of quality systems to ensure ongoing compliance.

Cotton Bales (Quality Control) Order, 2023

On February 28, 2023, the Ministry of Textiles notified the Cotton Bales (Quality Control) Order, 2023 *vide* S.O. 948(E), mandating that all suppliers of cotton bales conform to BIS certification under IS 12171:2019 and bear the Standard Mark under a license from BIS in accordance with Scheme-II of Schedule II of the BIS Regulations by August 27, 2023. Further, the Central Government has been given the power to give directions in writing to any person or officer or any authority for any of the purposes of the EPA, including the power to direct the closure, prohibition or regulation of any industry, operation or process.

As per the Notification, any construction of new projects or activities or the expansion or modernisation of existing projects or activities as listed in the Schedule attached to the notification entailing capacity addition with change in process and or technology can be undertaken only after the prior environmental clearance from the Central Government or as the case may be, by the State Level Environment Impact Assessment Authority, duly constituted by the Central Government under the provisions of the EPA, in accordance with the procedure specified in the notification. The environmental clearance process for new projects comprises of four stages *viz*. screening, scoping, public consultation and appraisal. However, in 2016, Ministry of Environment, Forest and Climate Change ("**MoEF**") issued a notification for integrating standard and objectively monitorable environmental conditions with building permissions for buildings of different sizes, with rigorous monitoring mechanism for implementation of environmental concerns and obligations in building projects. This is in line with the objective of the Central Government to streamline the permissions for buildings and construction sector so that affordable housing can be provided to weaker sections in urban area under the scheme 'Housing for All by 2022'. It is proposed to remove the requirement of seeking a separate environment clearance from the MoEF for individual buildings having a total build up area between 5,000 square metre and 150,000 square metre, apart from adhering to the relevant bye-laws of the concerned State authorities.

The Water (Prevention and Control of Pollution) Act, 1974 (the "Water Act")

Any municipal solid waste generated in a city or a town was required to be managed and handled in accordance with the compliance criteria and the procedure laid down in Schedule II of the Waste Management Rules, 2000. The Waste Management Rules, 2000 made the persons or establishments generating municipal solid wastes responsible for ensuring delivery of wastes in accordance with the collection and segregation system as notified by the municipal authority. The Waste Management Rules, 2000 have been superseded by the Waste Management

Rules, 2016 which stipulate various duties of waste generators which, inter alia, include segregation and storage of waste generated by them in the manner prescribed in the Waste Management Rules, 2016; separate storage of construction and demolition waste; and payment of user fee for solid waste management as specified in the bye-laws of the local bodies.

The MSMED Act provides for the memorandum of micro, small and medium enterprises to be submitted by the relevant enterprises to the prescribed authority. While it is compulsory for medium enterprises engaged in manufacturing to submit the memorandum, the submission of the memorandum by micro and small enterprises engaged in manufacturing is optional. The MSMED Act defines a supplier to mean a micro or small enterprise that has filed a memorandum with the concerned authorities. The MSMED Act ensures that the buyer of goods makes payment for the goods supplied to him by a registered MSME supplier immediately or before the date agreed upon between the buyer and such supplier.

In addition, regulations relating to classification of land may be applicable. Usually, land is broadly classified under one or more categories such as residential, commercial or agricultural. Land classified under a specified category is permitted to be used only for such specified purpose. Where the land is originally classified as agricultural land, in order to use the land for any other purpose the classification of the land is required to be converted into commercial or industrial purpose, by making an application to the relevant municipal or town and country planning authorities. In addition, some State Governments have imposed various restrictions, which vary from state to state, on the transfer of property within such states. Such rules include *inter alia* the nature of declarations that are required to be made such as the name and address of the manufacturer, the dimensions and weight of the commodity, and increased visibility of the retail price.

Several additional provisions have now been brought into force with effect from November 21, 2025, including Sections 1–41 (applicability, definitions, prohibition of gender-based discrimination, fixation of minimum wage rates, hours of work, overtime, fines, deductions and statutory bonus), Sections 42(4) and 42(9) (State Advisory Boards for minimum wage fixation), Sections 43–66 (payment of dues in case of death, penalties and offences), Sections 67(1), 67(2)(a)–(r), (u)–(zc), 67(3)–(5) (rule-making powers of governments), Section 68 (power of the Central Government to remove difficulties), and Section 69 (repeal of earlier wage-related legislations).

Overview

Our Company was incorporated in March 2024. Prior to its incorporation, our Promoters, Mr. Sanjay Gupta and Mr. Sooraj Gupta, were engaged in the textile business through their respective proprietorship concerns. Mr. Sanjay Gupta was operating in the textile business under the name of M/s SR Fabrics since 1994, while Mr. Sooraj Gupta was managing business through M/s SG Trader since 2017 and M/s Neelmadhav Textiles since 2023, primarily engaged in third-party manufacturing and wholesale distribution of denim fabrics.

Our Company was subsequently incorporated and the Promoters, Mr. Sanjay Gupta and Mr Sooraj Gupta appointed as Directors of the Company, with the object of taking over the ongoing operations of the aforementioned proprietorship concerns and continuing their denim fabrics business under a single unified entity with formal recognition. Thereafter, the business transfer from the proprietorships to our Company was agreed, confirmed, and made effective from March 31, 2024, through the execution of three separate Business Transfer Agreements dated April 06, 2024 ("**BTAs**") with each of the proprietorship concerns whereby the Company acquired all assets and liabilities of the proprietorship concerns. Pursuant to the execution of the BTAs, our Company acquired all assets and liabilities relating to the respective businesses as on the effective date of the BTAs. Ms. Sanyogita Gupta was subsequently inducted on the Board of Directors of the Company as a Non-Executive Director with effect from July 20, 2024 and was thereafter categorised as a Promoter Director with effect from March 06, 2026, in accordance with applicable laws and corporate approvals.

We are engaged in the manufacturing of denim fabrics through third-party manufacturing facilities. In addition to our manufacturing activities, we are also involved in the wholesale distribution of denim fabrics across India. The fabrics for distribution are procured from various distributors and suppliers to cater to diverse market demands.

Our product offerings primarily include grey fabrics and finished denim fabrics, which are distributed across key markets in to Delhi, Uttar Pradesh, Gujarat, Haryana and Rajasthan. We manufacture denim fabrics under our own brand name through both third-party manufacturing arrangements and leased self-production facility. For outsourced production, we have partnered with manufacturing facilities located in Narol and Piplaj, Ahmedabad, which are capable of producing finished denim fabrics directly from cotton yarn using raw materials supplied by our Company.

Our manufacturers, with whom we are currently engaged with for the production process, follow standard industry norms in the fabrics manufacturing process. The manufacturers also enable us to oversee the process of manufacturing process as per our requirement, without their intervention. We further inspect the fabric prior to dispatch to ensure that the fabrics are manufactured in accordance with our requirements.

The process of manufacturing of our fabrics commences with procurement of raw materials, specifically cotton yarn, which is a fundamental material of our fabrics. Next step on our manufacturing is yarn warping wherein the yarn is arranged in parallel and evenly spaced on warp beams, preparing it for the subsequent weaving process. After yarn dyeing, the dyed yarn is then woven into fabric using air jet looms. Following weaving, the fabric undergoes a series of finishing treatments. These treatments may involve processes such as singeing, wet finishing, foam finishing, over-dyeing, bleach washing, etc, all aimed at achieving the desired appearance, ensuring it meets the desired hand feel. Once the finishing process is completed, the fabric is then inspected to ensure that the quality and standards of manufactured fabrics are as per the desired requirements and subsequently they are rolled onto fabric rolls and are ready for distribution.

In line with the objective of business expansion and value chain integration, our Company has recently set up a limited self-manufacturing line through leased machineries for which commercial operations are yet to commence in full, in addition to continuing with third-party manufacturing and trading operations. This strategic step enables us to partially carry out self-production of denim fabrics while maintaining supply partnerships with integrated third-party manufacturers.

1. Appeal in Show Cause Notice bearing ref. no. ZD070923035849U dated September 24, 2023	
Section	Section 73 of CGST / DGST Act, 2017
Authority	Additional Commissioner, Delhi East
Case Details	Mr. Sanjay Gupta ("**Appellant**") received a show cause notice dated September 24, 2023 relating to FY 2017–18 under Section 73 of the CGST / DGST Act, 2017. Thereafter, the Appellant submitted its reply with supporting documents to the authority on October 24, 2023, however, an order was passed against the Appellant on December 25, 2023 stating that the '*reply submitted by the authorized representative is not satisfactory/justified*' and raising a demand of ₹2,69,824/- (CGST and DGST) on account of alleged excess availment of Input Tax Credit ("**ITC**") by the Appellant. Aggrieved by the impugned order, the Appellant submitted this appeal on March 23, 2024 against the said order, arguing that the mandatory scrutiny process under Section 61 of the CGST Act, 2017 was not properly followed, the show cause notice under Section 73 was vague and issued without jurisdiction or application of mind, and the adjudicating authority failed to consider the detailed replies and reconciliations submitted. On merits, it is asserted that there was no excess ITC, that the department committed computational errors, and that any minor excess identified was already reversed in a subsequent year with interest duly paid. Accordingly, the appellant seeks quashing of the impugned order and a personal hearing before final adjudication. The appeal is pending before the authority and the management of the Company expects a favourable outcome.

The Noticee submitted its reply to the authority on July 19, 2025. An order dated December 29, 2025 was passed against the Noticee confirming the proposed demand of ₹ 1,90,572/- (IGST, CGST and SGST and penalty) under Section 174 of the Act, stating that the reply submitted by the Noticee was not found to be satisfactory. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an Individual Investor had the option to submit the ASBA Form with any of the Designated Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing continued to be six Working Days.

SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI *vide* its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public Issue closure to listing would continue to be six Working Days during this phase.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, *vide* SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("**T+3 Notification**"). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue, shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

The Issue is being made under Phase III of the UPI (on a mandatory basis).

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. Names of Entities Responsible for Finalising the Basis of Allotment in a Fair and Proper Manner

The authorized employees of the Stock Exchange, along with the Lead Manager and the Registrar, shall ensure that the basis of Allotment is finalized in a fair and proper manner in accordance with the procedure specified in SEBI ICDR Regulations.

Method of Allotment as may be Prescribed by SEBI from Time to Time

Our Company will not make any Allotment in excess of the Equity Shares offered through the Issue through the Prospectus, except in case of oversubscription for the purpose of rounding off to make Allotment, in consultation with the Designated Stock Exchange. The Allotment of Equity Shares to Applicants other than to the Individual Investors who applies for minimum application size shall be on a proportionate basis within the respective Investor categories and the number of securities Allotted shall be rounded off to the nearest integer, subject to minimum Allotment being equal to the minimum application size.

The Allotment of Equity Shares to each Individual Investors who applies for minimum application size shall not be less than the minimum lot, subject to the availability of Equity Shares in Individual Investors who applies for minimum application size category, and the remaining available Equity Shares, if any, shall be Allotted on a proportionate basis.

BASIS OF ALLOTMENT

Allotment will be made in consultation with the BSE SME (the Designated Stock Exchange). In the event of oversubscription, the Allotment will be made on a proportionate basis in marketable lots as set forth hereunder:

1. The total number of Equity Shares to be allocated to each category as a whole shall be arrived at on a proportionate basis, i.e., the total number of Equity Shares applied for in that category multiplied by the inverse of the over subscription ratio (number of Applicants in the category x number of Equity Shares applied for).

2. The number of Equity Shares to be allocated to the successful Applicants will be arrived at on a proportionate basis in marketable lots (i.e. total number of Equity Shares applied for into the inverse of the over subscription ratio).

3. For applications where the proportionate Allotment works out to less than 1000 Equity Shares the allotment will be made as follows:

    i. Each successful Applicant shall be allotted 1000 Equity Shares; and
    ii. The successful Applicants out of the total Applicants for that category shall be determined by the drawl of lots in such a manner that the total number of Equity Shares allotted in that category is equal to the number of Equity Shares worked out as per (2) above.

4. If the proportionate Allotment to an Applicant works out to a number that is not a multiple of 1000 Equity Shares, the Applicant would be allotted Equity Shares by rounding off to the nearest multiple of 1000 Equity Shares subject to a minimum Allotment of 1000 Equity Shares.

5. If the Shares Allotted on a proportionate basis to any category is more than the Equity Shares allotted to the Applicants in that category, the balance available Equity Shares or allocation shall be first adjusted against any category, where the Allotted Equity Shares are not sufficient for proportionate Allotment to the successful Applicants in that category, the balance Shares, if any, remaining after such adjustment will be added to the category comprising Applicants applying for the minimum number of Equity Shares. If as a result of the process of rounding off to the nearest multiple of 1000 Equity Shares, results in the actual Allotment being higher than the Equity Shares offered, the final Allotment may be higher at the sole discretion of the Board of Directors, up to 110% of the size of the Issue specified under the chapter "***Capital Structure***" on page no. 60 of this Prospectus.

6. Since present Issue is a fixed price Issue, the allocation in the Net Issue to the public category in terms of Regulation 253(3) of the SEBI ICDR Regulations shall be made as follows:

a) Minimum 50% to Individual Investors who apply for minimum application size; and
b) Remaining to:
   i. Individual Applicants other than those who apply for more than minimum application size; and
   ii. Other Investors including corporate bodies or institutions, irrespective of the number of specified securities applied for.
c) The unsubscribed portion in either of the categories specified in (a) or (b) above may be allocated to the Applicants in the other category.

Explanation: If the category of Individual Investors who apply for minimum application size is entitled to more than 50% of the Issue size on a proportionate basis, such Individual Investors shall be allocated that higher percentage.

Illustration explaining the procedure of allotment for Non-Institutional Investors in case of IPO by SME companies.

Example A.

(1) Total number of specified securities on offer @₹ 20 per share: 7.2 crore specified securities.

(2) Specified securities on offer for non-institutional investors' category: 108 Lakhs specified securities (with 15% allocation).

(3) Out of the total non-institutional investors' category,

(a) one third is reserved for applications above two lots and up to such lots equivalent to application size not more than ten lakh rupees -i.e. 36 lakhs of specified securities
(b) balance two-third is reserved for applications above ten lakh rupees – i.e. 72 lakhs of specified securities

(4) The issue is over-all subscribed by 2.5 times, whereas the non-institutional investors' category mentioned in 3 (a) above is oversubscribed 1.5 times and 3(b) is oversubscribed 3 times.

(5) The issuer has fixed the lot size as 6000 specified securities (based on SEBI Circular dated February 21, 2012 – Standardized lot size for SME Exchange/ Platform) and in multiples thereof.

(6) Therefore, the minimum application size for non-institutional investors is 18,000 specified securities (i.e. the application should be for more than two lots and in multiples of one lot (i.e. 6000 specified securities) thereof).

(7) A total of one hundred investors have applied in the issue under 3(a) category, in varying number of application size i.e. between 3 to 8 lots (18,000 to 48,000 specified securities), based on the maximum application size under 3(a) not more than ten lakh rupees (Application size of 8 lots = 8*6000*20 = 9,60,000/-).

(8) Out of the one hundred investors, there are five non-institutional investors A, B, C, D and E who have applied as follows: A has applied for 18,000 specified securities. B has applied for 30,000 specified securities. C has applied for 36,000 specified securities. D has applied for 42,000 specified securities and E has applied for 48,000 specified securities.

(9) As the allotment to a non-institutional investor cannot be less than the minimum application size in NII category, subject to availability of shares, the remaining available shares, if any, shall be allotted on a proportionate basis.

The actual entitlement shall be as follows:

Sr. No.	Name of Investor	Total Number of specified securities applied for	Total number of specified securities eligible to be allotted
1.	A	18,000	18,000 specified securities (i.e. the minimum applications size)
2.	B	24,000	18,000 specified securities (i.e. the minimum applications size) + 0 specified securities {Since, [{36,00,000 - (100 * 18000)} / {54,00,000 - (100 * 18000)}] * 6000 (i.e. 24,000-18,000) = 3000 securities; which is less than 1 lot, so no additional lot shall be allotted}
3.	C	30,000	18,000 specified securities (i.e. the minimum applications size) + 6000 specified securities {Since, [{36,00,000 - (100 * 18000)} / {54,00,000 - (100 * 18000)}] * 12000 (i.e. 30,000-18,000) = 6000 securities}
4.	D	42,000	18,000 specified securities (i.e. the minimum applications size) + 12000 specified securities {Since, [{36,00,000 - (100 * 18000)} / {54,00,000 - (100 * 18000)}] * 24000 (i.e. 42,000-18,000) = 12000 securities}
5.	E	48,000	18,000 specified securities (i.e. the minimum applications size) + 12000 specified securities {Since, [{36,00,000 - (100 * 18000)} / {54,00,000 - (100 * 18000)}] * 30000 (i.e. 48,000-18,000) = 15000 securities; which is more than 2 lots but less than 3 lots, therefore only 2 lots shall be allotted}

Note: For category 3(b), calculation methodology shall be similar to above.

Example B.

(1) Total number of specified securities on offer @₹ 20 per share: 7.2 crore specified securities.

(2) Specified securities on offer for non-institutional investors' category: 108 lakhs specified securities (with 15% allocation).

(3) Out of the total non-institutional investors' category,

(a) one third is reserved for applications above two lots and up to such lots equivalent to application size not more than ten lakh rupees -i.e. 36 lakhs of specified securities

(b) balance two-third is reserved for applications above ten lakh rupees – i.e. 72 lakhs of specified securities

(4) The issue is over-all subscribed by 7.16 times, whereas the non-institutional investors' category mentioned in 3 (a) above is oversubscribed 15.5 times and 3(b) is oversubscribed 3 times.

(5) The issuer has fixed the lot size as 6000 specified securities (based on SEBI Circular dated February 21, 2012 – Standardized lot size for SME Exchange/ Platform) and in multiples thereof.

(6) Therefore, the minimum application size for non-institutional investors' is 18,000 specified securities (i.e. the application should be for more than two lots and in multiples of one lot (i.e. 6000 specified securities) thereof).

(7) A total of two thousand investors have applied in the issue under 3(a) category, in varying number of application size i.e. between 3 to 8 lots (18,000 to 48,000 specified securities), based on the maximum application size under 3(a) not more than ten lakh rupees (Application size of 8 lots = 8*6000*20 = 9,60,000/-).

(8) As per the allotment procedure, the allotment to non-institutional investors shall not be less than the minimum application size in NII category, subject to availability of shares.

Since the total number of specified securities on offer to the non-institutional investors' applications under 3(a) is 36,00,000 and the minimum application size is 18,000 specified securities, the maximum number of non-

institutional investors' who can be allotted this minimum application size should be 200. In other words, 200 applicants shall get the minimum application size (by draw of lots) and the remaining 1800 applicants will not get any allotment.

The details of the allotment shall be as follows:

No. of lots	No. of shares at each lot	No. of investors applying at each lot	Total no. of shares applied for at each lot	No. of investors who shall receive lots according to minimum application size (to be selected by a lottery)
A	**B**	**C**	**D= (B*C)**	**E**

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the GoI and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, 1991, foreign investment is permitted (except in the prohibited sectors) in Indian companies, either through the automatic route or the approval route, depending upon the sector in which foreign investment is sought to be made, but the foreign investor is required to follow certain prescribed procedures for making such investment.

The RBI, the DIPP and other concerned ministries / departments are responsible for granting approvals for foreign investment. The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy, notified by the DPIIT File No. 5(2)/2020FDI Policy, which subsumes and supersedes all previous press notes, press releases, clarifications, and circulars on FDI issued by the DPIIT which were in force and effect as on October 15, 2020. The Consolidated FDI Policy will be valid and remain in force until superseded in totality or in part thereof. The transfer of shares between an Indian resident and a Non-Resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the Non-Resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI / RBI.

In accordance with Press Note 3 of 2020, dated April 17, 2020 ("**Press Note**"), issued by the DPIIT, the Consolidated FDI Policy and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments under the foreign direct investment route by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and FEMA NDI Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, issued on December 8, 2020, a multilateral bank or fund of which India is a member shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank or fund in India. Subsequently, vide Press Note No. 2 (2026 Series), dated March 15, 2026 issued by the DPIIT, the FDI Policy has been further amended to, inter alia, define the expression "beneficial owner" and to provide that prior approval of the Government of India shall be required only where citizen(s) and/or entity(ies) of a country sharing a land border with India hold, directly or indirectly, individually or cumulatively, more than 10% of the shares, capital or profits of the investor entity, or exercise control over such investor entity, or exercise ultimate effective control over the investee entity. The amendments under Press Note No. 2 (2026 Series) has come into effect on May 02, 2026, being the date of notification of the corresponding amendments to the FEMA NDI Rules.

Further, in accordance with the amendment to the Companies (Share Capital and Debentures) Rules, 2014 vide notification dated May 4, 2022 issued by Ministry of Corporate Affairs, a declaration shall be inserted in the share transfer form stipulating whether government approval shall be required to be obtained under FEMA NDI Rules prior to transfer of shares, as applicable. Each Applicant should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government is required, and such approval has been obtained, the Applicant shall intimate our Company and the Registrar to the Issue in writing about such approval along with a copy thereof within the Issue Period.

As per the existing policy of the Government and the extant FDI guidelines on sectoral caps, pricing guidelines, etc. as amended by RBI from time to time, OCBs cannot participate in this Issue. Investors are advised to confirm their eligibility under the relevant laws before investing and / or subsequent purchase or sale transaction in the Equity Shares of our Company. Investors will not issue, sell, pledge or transfer the Equity Shares of our Company to any person who is not eligible under applicable laws, rules, regulations and guidelines. Our Company, the Underwriters and their respective directors, officers, agents, affiliates and representatives, as applicable, accept no responsibility or liability for advising any Investor on whether such Investor is eligible to acquire Equity Shares of our Company.

Investment conditions / restrictions for overseas entities

Under the current Consolidated FDI Policy, the maximum amount of investment (sectoral cap) by foreign investor in an issuing entity is composite unless it is explicitly provided otherwise including all types of foreign investments, direct and indirect, regardless of whether it has been made for FDI, FPI, NRI/OCI, LLPs, FVCI, investment vehicles and DRs under FEMA NDI Rules. Any equity holding by a person resident outside India resulting from conversion of any debt instrument under any arrangement shall be reckoned as foreign investment under the composite cap.

Portfolio investment upto aggregate foreign investment level of 49% or sectoral / statutory cap, whichever is lower, will not be subject to either Government approval or compliance of sectoral conditions, if such investment does not result in transfer of ownership and / or control of Indian entities from resident Indian citizens to non-resident entities. Other foreign investments will be subject to conditions of Government approval and compliance with sectoral conditions as per Consolidated FDI Policy. The total foreign investment, direct and indirect, in our Company will not exceed the sectoral / statutory cap.
